Reasoning with Logic Programming Jose Julio Alferes, Luís Moniz Pereira, 1996-07-25 This workshop is dedicated to research projects on the early universe discussing strategies for studying faint distant objects in the optical and infrared spectral regions This field is evolving very rapidly Observational constraints on the evolution and formation of galaxies and large scale structures as well as the cosmic chemical evolution were critically discussed with regard to the theory and numerical simulations In this context the VLT first generation instrument capabilities were presented comprehensively and their use as cosmological tools discussed The concluding remarks focussed on the analysis of various possibilities for the VLT second generation instrumentation Many of these topics were covered by invited reviews and talks and some contributed talks which are included in this volume

Computational Logic: Logic Programming and Beyond Antonis C. Kakas, Fariba Sadri, 2003-08-02 Alan Robinson This set of essays pays tribute to Bob Kowalski on his 60th birthday, an anniversary which gives his friends and colleagues an excuse to celebrate his career as an original thinker, a charismatic communicator, and a forceful intellectual leader. The logic programming community hereby and herein conveys its respect and thanks to him for his pivotal role in creating and fostering the conceptual paradigm which is its *raison d'être*. The diversity of interests covered here reflects the variety of Bob's concerns. Read on! It is an intellectual feast. Before you begin, permit me to send him a brief personal but public message: Bob, how right you were and how wrong I was I should explain. When Bob arrived in Edinburgh in 1967, resolution was as yet fairly new, having taken several years to become at all widely known. Research groups to investigate various aspects of resolution sprang up at several institutions, the one organized by Bernard Meltzer at Edinburgh University being among the first. For the half-dozen years that Bob was a leading member of Bernard's group, I was a frequent visitor to it and I saw a lot of him. We had many discussions about logic, computation, and language.
