

The fuzzy logic has been used to extend various database models

The purpose of introducing fuzzy logic in databases is to enhance the classical database models such that uncertain and imprecise information can be represented and manipulated

In recent years, various fuzzy data models and fuzzy database systems have been proposed

These models and systems extend relational and object-Oriented data models using the fuzzy set and the possibility theory to provide the ability of representing ill-known data and issuing queries containing Soft restrictions

**Kybernetika**, 2000

**Medical Data Mining and Knowledge Discovery** Krzysztof J. Cios, 2001-01-12 Modern medicine generates almost daily huge amounts of heterogeneous data For example medical data may contain SPECT images signals like ECG clinical

information like temperature cholesterol levels etc as well as the physician s interpretation Those who deal with such data understand that there is a widening gap between data collection and data comprehension Computerized techniques are needed to help humans address this problem This volume is devoted to the relatively young and growing field of medical data mining and knowledge discovery As more and more medical procedures employ imaging as a preferred diagnostic tool there is a need to develop methods for efficient mining in databases of images Other significant features are security and confidentiality concerns Moreover the physician s interpretation of images signals or other technical data is written in unstructured English which is very difficult to mine This book addresses all these specific features *Proceedings* ,1996
