

# MATHEMATICAL MODELING SIMPLIFIED

Mathematical Modeling is a cyclical process where students engage in:

- making sense of the situation and posing a modeling problem
- listing quantities and assumptions;
- representing, exploring and creating a solution/model
- interpreting and revising the model
- reporting out

-ECSTEMMA

## MODELING CYCLE

"Mathematical Modeling is an equity and empathy lever in E-Q mathematics as it helps students make sense of real-world situations through problem-posing and decision-making."

## CULTURALLY RESPONSIVE MATHEMATICS TEACHING (CRMT) FRAMEWORK

### Mathematizing the World

Helps focus students on developing their observation and problem posing skills

#### Steps:

1. Find an image, video, or object to display
2. Ask students the following questions:
  - What do you notice?
  - What do you wonder?
  - What questions can be answered using math?
3. Record student responses
4. Pose a posed question

### If I Knew... Then I Could...

Helps focus students on identifying the important quantities

#### Steps:

1. Find an image, video, or object to display
2. Have students complete the following statement: "If I knew \_\_\_\_\_, then I could \_\_\_\_\_"
3. Record student responses

### Reasonable Assumptions

Helps focus students on developing their observation and problem posing skills

#### Steps:

1. Find an image, video, or object to display
2. Have a brief group discussion of several things you would have to know to figure out the question
3. Identify several "reasonable" assumptions that the information is not readily available
4. Have students work in pairs and create a list of reasonable assumptions and unreasonable assumptions for each "reasonable" item

### What If... Scenarios

Helps focus students on considering what might change in their model when other assumptions or variables are considered

#### Steps:

1. Find an image, video, or object to display
2. Have students complete the following statement: "What if \_\_\_\_\_, quantity change?"
3. Record student responses
