pictorially and often in more than one dimension while topology among the youngest and rowdiest branches of modern geometry offers a glimpse into a strange dimension where properties remain unchanged no matter how a figure is twisted stretched or compressed Clear and concise comments at the beginning of each section explain the nature and importance of the math needed to solve each puzzle A carefully explained solution follows each problem In many cases all that is needed to solve a puzzle is the ability to think logically and clearly to be on the alert for surprising off beat angles that strange hidden factor that everyone else had overlooked Fully illustrated this engaging collection will appeal to parents and children amateur mathematicians scientists and students alike and may as the author writes make the reader want to study the subject in earnest and explains some of the inviting paths that wind away from the problems into lush areas of the mathematical jungle 65 black and white illustrations

Relativism and Monadic Truth Herman Cappelen, John P. Hawthorne, 2009-01-15 Cappelen and Hawthorne present a powerful critique of fashionable relativist accounts of truth and the foundational ideas in semantics on which the new relativism draws They argue compellingly that the contents of thought and talk are propositions that instantiate the fundamental monadic properties of truth and falsity
