Azid,2017-03-27 The Islamic labor market rests on the principles of the free market exchange of Islamic economics  
Regrettably the latter has failed to keep pace with the rapidly growing academic and professional developments of the former  
Much of the published work within Islamic economics is idealistic if not radically ideological with little relevance to the  
Islamic labor market leaving students of Islamic economics without a coherent body of economic theory to understand the  
practical objectives of Shariah that gives a sense of direction to the developments in this field Drawing upon received sources  
of goals of Shariah the authors present an independent academic work which Emphasizes the common conceptual grounds of  
labor market behavior shared by the objectives of Shariah approach as well as the conventional approach to economics  
Adopts standard tools of contemporary economics to explain the industrial relations Extends the conventional scope of the  
labor market and forces of the labor market under the umbrella of Shariah Enables readers and practitioners of Islamic  
economics to make economic sense of Shariah compliance and human resource development Explains how the economics of  
Shariah is liable to offer moral guidance and a sense of direction to regulators and practitioners of the Islamic labor market  
Labor in an Islamic Setting will be of interest to postgraduate students academics middle and senior management in both the  
western and the Islamic business communities researchers and policy makers **Crash Course in Storytime**
