early years are very important for the child's development as an athlete and later on as a healthier and more wholesome exerciser. An active child usually becomes more active as an adult too. Research shows that at different ages different elements need to be trained in particular but the foundation of all motor learning is that you learn new things faster the younger you are. But the learning should be target oriented, well planned and be conducted with research as its foundation. That learning is done with joy and with elements of play is a must for children to feel a desire to learn new things. The purpose of this book is to give the tennis coaches who work with children aged 3-5 years a well planned training system. Through this book coaches can systematically train their players step by step with the aim that the players learn to play with a broad physical base with elements of tennis which they will benefit from for the rest of their lives not just in tennis.
