**Opposing Poetries: Readings** Hank Lazer, 1996 *Opposing Poetries* presents a selection of Hank Lazer's writing on a range of issues in contemporary American poetry. Through a series of recurring cultural material and institutional perspectives, Lazer investigates the assumptions and habits that govern conflicting conceptions of contemporary American poetry while refining, reconsidering, and questioning his own and modern theorists' assertions and claims relating to experimental poetry. In Volume Two, Lazer presents a series of sustained readings of important experimental texts. Included are the poets Susan Howe, Lyn Hejinian, Bruce Andrews, and James Sherry. Lazer places these poets in the context of contemporary literary theory and inspects both the successes and failures of said theory to interpret these works.

*Opposing Poetries* Hank Lazer, 1996-08-12 Begins a series presenting collections of survey articles pivoting around the notion of computation. The inaugural topics include generalized rational approximation subject to linear constraints, matrix exponential approximations in the numerical solution of differential equations, unbounded fan-in circuits, and fixpoint semantics for a Petri net model of definite clause logic programs. Each article is self-contained and all assume a high sophistication in mathematics. Future volumes may focus on a special subfield such as computational graph theory, approximation, or computability. **Opposing Poetries: Readings** Hank Lazer, 1996 Explains to structural engineers some of the basic equations for analyzing and designing buildings that were devised at the end of the 19th century but were so unmanageably complex to solve that they were displaced by approximation techniques until the recent advent of electronic computer. Heyman Engineering, U of Cambridge, warns that some of the equations turn out not to fit reality as close as future occupants of buildings might prefer and explains how to use them and in what context. **Opposing Poetries** Hank Lazer, 1996-08-12 *Opposing Poetries* presents a selection of Hank Lazer's writing on a range of issues in contemporary American poetry. Through a series of recurring cultural material and institutional perspectives, Lazer investigates the assumptions and habits that govern conflicting conceptions of contemporary American poetry while refining, reconsidering, and questioning his own and modern theorists' assertions and claims relating to experimental poetry. Volume One examines the shift in the governing assumptions of contemporary poetic practice. Lazer inspects the key critical works addressing poetries in the 1980s and 1990s as well as the political and aesthetic impact of modern critics, poetry reading programs, and of the publishing industry and libraries on contemporary poetic practice.

*Poetry's Afterlife* Kevin Stein, 2010-07 The great pleasure of this book is the writing itself. Not only is it free of academic and lit crit jargon, it is lively prose, often deliciously witty or humorous, and utterly contemporary. *Poetry's Afterlife* has terrific classroom potential, from elementary school teachers seeking to inspire creativity in their students to graduate students in MFA programs to working poets who struggle with the aesthetic dilemmas Stein elucidates and to teachers of poetry on any level. Beckian Fritz Goldberg, Arizona State
