Ontological Commitment Revisited Jesús Padilla Gálvez,2021-08-23 Ontological commitment implies that each theory is supposed to specify the type of entities that form its components Representatives of a theory share an ontological commitment in relation to the objects they refer to There are theories that admit the existence of universals while others do not As there are different ways of speaking about universals it is necessary to decide what a universal term corresponds to It is essential to have a criterion that enables us to decide which kinds of objects are allowed as references for the terms used In this volume two different approaches are discussed first in cases where only extensional languages are accepted second when intensional elements are required to determine the meaning such terms as Sachverhalt intentional statements or representations The ontological commitment associated with extensional theories exclusively admits the existence of physical objects whereas intensional theses additionally include universal and abstract entities The study of ontological commitment enables us to measure the ontological economy of theories This serves as a basis for the choice of theory The authors of this volume discuss relevant issues of both models and provide new solutions , **The Ontology of the Analytic Tradition and Its Origins** Jan Dejnozka,1996 The analytic movement advertised its linguistic turn as a radical break from the two thousand year old substance tradition But this is an illusion On the fundamental level of ontology there is enough reformulation and presupposition of traditional no entity without identity themes to analogize Frege Russell Wittgenstein and Quine to Aristotle as paradigmatic of modified realism Thus the pace of ontology is glacial Frege and Russell not Wittgenstein and Quine emerge as the true analytic progenitors of no entity without identity offering between them at least twenty nine private language arguments and sixty four no entity without identity theories *Proceedings of the 15th International Marine Design Conference* Austin A. Kana,2024-08-22 The 15th International Marine Design Conference IMDC 2024 was organized by the Department of Maritime and Transport Technology Delft University of Technology and was hosted by the Netherlands Defence Materiel Organisation at the Marine Etablissement Amsterdam MEA The aim of the IMDC is to promote

only been marginal The workshop HUMACS 2001 aimed to challenge the relevance of this last point **Ontology and the Semantic Web** Robert M. Colomb,2007 In order for information systems supporting two different organizations to interoperate there must be an agreement as to what the words mean There are many such agreements in place supporting information systems interoperation in many different application areas Most of these agreements have been created as part of diverse systems development processes but since the advent of the Semantic Web in the late 1990s they have been studied as a kind of software artifact in their own right called an ontology or description of a shared world This book brings together developments from philosophy artificial intelligence and information systems to formulate a collection of functional requirements for ontology development Once the functional requirements are established the book looks at several ontology representation languages RDFS OWL Common Logic and Topic Maps to show how these languages support the functional requirements what deficiencies there are and how the languages relate to each other Besides a collection of running examples used throughout the book the entire treatment is supported by an extended example of a hypothetical ontology for the Olympic Games presented first as a set of chapter end exercises and then as a set of solutions which illustrate the various points made in the text in the context of a single coherent development *Ontological Commitment* Richard H. Severens,1974 Sponsored by the Dept of Philosophy of the University of Georgia Papers of the 2d conference are entered under the title Education and ethics Includes bibliographical references and index **The Philosophical Review** Jacob Gould Schurman,James Edwin Creighton,Frank Thilly,Gustavus Watts Cunningham,1911 An international journal of general philosophy The Journal of Philosophy ,1910 Covers topics in philosophy psychology and scientific methods Vols 31 include A Bibliography of philosophy 1933 **Perspectives on Nursing Theory** Leslie H. K. Swindler,1991 In this moderate realist account of the whole range of issues facing contemporary analytic philosophy J K Swindler aims to fill the gap in the literature between extreme realism and extreme nominalism He discusses such fundamental concepts as existence property universality individual and necessity analyzes the paradoxes of negative existentials and the substitutivity of co referential terms and defends objectivity in philosophy The study moves through three phases first an argument that objective philosophical truth is attainable second an extended realist analysis of fundamental ontological concepts and finally a demonstration of advantages of this ontology over leading alternatives Weaving An Analysis of the Constitution of Objects will be of interest to all philosophers working in contemporary philosophy philosophy of language logic and metaphysics and will serve as an excellent text for advanced undergraduate and graduate courses in metaphysics **Abstract Entities** Ash Gobar,1959 **Logic, Ontology, and Language** Herbert Hochberg,1984 Indian Philosophical Quarterly ,2001
