Corps Commanders of the Bulge Harold R. Winton,2007 Study of the Battle of the Bulge

Six Months to Oblivion Werner Girbig,1997 This book covers the last chapter the decline and fall of the air defense of Germany It is a diary of losses and a chronicle in which the fighter pilot plays the lead It tells of the young men who joined their squadrons full of optimism

and derring do only to give their lives to no purpose in a last desperate endeavour nIts focal point is the controversial Operation Bodenplatte on the morning of New Year s Day 1945 an operation in which the German fighter force received its final mortal wound losing some 230 aircrew in less than 4 hours the fighter units suffered their most severe defeat Only now after years of evaluation of all available sources can the true figures of fighter losses on January 1 1945 be reported nBut this picture of the sacrifice of fighter formations does not mean that fighter pilots were unable to score successes The figures for enemy aircraft shot down and the contact reports show clearly that the German pilots could still both parry and deal out hard punches nFew people have any real idea of the actual scale of the German fighter force s sacrifice The imagination boggles at the tragic events that took place in the skies over Europe as the war neared its end even in the perspective of history the full extent of the debacle can scarcely be depicted nIn Six Months to Oblivion Werner Girbig explains these last months of the Luftwaffe and the fall of a once mighty air force **Battle of the Airfields** Norman Franks,2000 On the morning of January 1 1945 over 800 Luftwaffe fighters took off to attack Allied air fields in Holland Belgium and France Norman Franks uses diaries and first hand accounts plus material from Germany to tell the story of Operation Bodenplatte which turned out to be a final act of self destruction as the Luftwaffe lost up to 300 of their aircraft and over 200 pilots in the battle

Bodenplatte John Manrho,Ron Putz,2010-07-16 Definitive account of the last great Luftwaffe attack of World War II Gripping stories of Fw 190s and Bf 109s in combat Contains hundreds of eyewitness accounts and rare photos In the early morning of January 1 1945 as the Battle of the Bulge smoldered to an end the German Luftwaffe assumed to be starved of fuel and fighting spirit launched a massive surprise low level strike on Allied airfields throughout France Belgium and Holland an operation code named Bodenplatte More than 900 German aircraft took to the skies and attacked the vulnerable fields destroying 200 Allied aircraft and damaging 150 more In a pyrrhic victory the Luftwaffe lost 271 fighters with many more damaged and 213 pilots irreplaceable losses at this stage of the war *Hitler's Miracle Weapons: The Luftwaffe and Kriegsmarine* Friedrich Georg,2003 How close did Hitler come to his dream of developing nuclear weapons What evidence is there for the design testing and production of such weapons and their carrier systems With this first volume in a series of at least three Friedrich Georg has begun to answer these questions in great detail The result is a groundbreaking new book on this topic This first volume describes the efforts of the Luftwaffe and Kriegsmarine to design and produce carrier systems for the nuclear weapons the scientists of the Third Reich were developing Following an introductory section in which the author outlines the Nazi atom bomb programme Georg then investigates the enormous variety of craft the Luftwaffe began to either adapt or develop anew that would be used to carry such weapons of mass destruction These included the search for an intercontinental Amerikabomber including the innovative Horten Ho XVIII Lighter designs such as the Arado Ar E 555 Messerschmitt P 1107 1108 and Junkers EF 132 140 are also described The various atom bombs themselves are thoroughly investigated from the 1 ton to the massive 30 ton variety Information about the variety of carrier systems being developed

and in at least one case actually built by the Kriegsmarine is also provided Finally the author investigates the reasons why Germany ultimately failed to produce the atom bomb Appendices provide the most up to date research on a variety of topics including the small number of craft Japan was developing to carry atom bombs and the Soviet capture of German nuclear research centres in the Baltic region at the end of the war Throughout the author is keen to only rely on the most reliable sources and lays many myths to rest in the process The result is a truly compelling and groundbreaking work

Hungary, 1944-1945--the forgotten tragedy Perry Pierik,1996 Using documents from German American and Hungarian archives and previously unpublished photographs the author describes Hitler s obsession with the Hungarian oilfields near Nagykanisza and how it influenced his military and political actions He also discusses the tragic extradition of the Hungarian Jews by SS commander Eichmann

Fighting with the Soviets Mark J. Conversino,1997 Conversino s story is as interesting as it is unfamiliar and succeeds in opening up Frantic s many dimensions including the personal as well as the political strategic and operational His revelations regarding the interactions between American servicemen and Ukrainian Russians are especially valuable and underscore the immense difficulties of implementing alliances at the grass roots level

Impact Benjamin King,Timothy J. Kutta,1998 It all began with a loose knit group of scientists and engineers in Weimar Germany Fixated on the idea of rocket propulsion they formed The Society for Space Travel in 1927 Some people called them dreamers who gained their inspiration from Jules Verne and the movie *The Woman in the Moon* Their experiments with rockets often came to naught and sometimes blew up in their inventors hands Twelve years later Adolf Hitler had plunged Germany into the most terrible war in history By mid 1944 German armies were reeling on all fronts and vast Allied bomber fleets were devastating the Third Reich while Germany had no strategic air force of its own The Allies after their conquest of Normandy thought the war would be over by Christmas But then the German rockets appeared From the flaming continent of Europe robot bombs with one ton warheads suddenly came soaring against England These sinister weapons took no evasive action and could not be deterred by bad weather or darkness they could not be stopped unless they were destroyed This book provides rare unpublished information on the terror that fell on Antwerp and the city of Li ge in the winter of 1944 45 The rockets did not stop falling until their launch sites had been overrun by Allied troops This work provides an operational context to the Third Reich s missiles that has previously been neglected or ignored
