HaworthPress.com A Mutual-Aid Model for Social Work with Groups Dominique Moyses Steinberg, 2014-02-24 Group work is a popular and widely used social work method. Focusing particularly on the central role of mutual aid in effective group work, this text presents the theoretical base, outlines core principles, and introduces the skills for translating those theories and principles into practice. A Mutual Aid Model for Social Work with Groups will help readers to catalyze the strengths of group members such that they become better problem solvers in all areas of life, from the playroom to the boardroom. Increased coverage of evaluation and evidence-based practice speaks to the field's growing concern with monitoring process and assessing progress. The book also includes worker-based obstacles to mutual aid, their impact, and their antidotes: pre-group planning, including new discussion on curriculum groups; group building by prioritizing certain goals and norms in the new group; the significance of time and place on mutual aid; and the role of the group worker maintaining mutual aid during so-called individual problem solving. An expanded discussion of anti-oppression and anti-oppressive practice unlocks a group's potential to make a difference and conflict useful. Special considerations in working with time-limited, open-ended, and very large groups. Case examples are used throughout to help bridge the gap between theory and practice, and exercises for class or field help learners to immediately apply conceptual material to their practice. All resources required to carry out the exercises are contained in over 20 appendices at the end of the book. Key points at the end of each chapter recap the major concepts presented, and a roster of recommended reading for each chapter points the reader to further resources on each topic. Designed to support ethical and successful practice, this textbook is an essential addition to the library of any social work student or human service practitioner working with groups.

Evidence-Based Group Work in Community Settings David E. Pollio, Mark J. Macgowan, 2013-09-13 There has been a strong recent trend towards incorporating evidence into Social Work practice in general and into group work in particular. This trend has focused on the education of students in the use of evidence, development of evidence-based interventions, and discussion of how evidence can be used to improve practice. A limitation of most of this literature is that it has been written by researchers for the consumption of practitioners, limiting the ability of evidence-based practices to be incorporated into unique community settings and with specific populations. In spite of this difficulty, implementation of evidence-based practices continues quietly in practice settings. This book describes efforts to integrate evidence into community settings, which have two foci. The first part details group models developed through collaborations between researchers and community agencies. Each chapter details efforts to implement research or review programs in community settings. The second part deals with issues around instruction and dissemination of evidence-based group work into practice settings. The volume makes a significant contribution to the discussion about evidence-based group work. This book was published as a special issue of *Social Work with Groups*.
