Security In Europe:

Security and Strategy in the New Europe Colin McInnes, 1992 How have priorities for European security changed in the wake of the cold war Can existing security institutions meet the challenges of the 1990s The Changing Politics of European Security S. Gänzle, A. Sens, 2007-01-30 The Changing Politics of European Security explores the key security challenges confronting Europe from relations with the US and Russia to the use of military force and the struggle against terrorism In the future the authors conclude European states will act alone independent of America on security matters

European Security in a Global Context Thierry Tardy, 2008-12-10 This new edited volume examines contemporary European security from three different standpoints It explores security dynamics first within Europe second the interaction patterns between Europe and other parts of the world the United States Africa the Middle East China and India and finally the external perceptions of European security The first part of the book analyses the European security landscape The roles of EU NATO and the OSCE are given particular attention as is the impact of their evolution or enlargement on the European security architecture and European security dynamics In this context Russia's repositioning as a major power appears as a shaping factor of contemporary European geopolitics The second part presents European security from an external perspective and considers interactions between Europe and other states or regions Security trends and actors in Europe are examined from an American Chinese and Indian perspective while Europe Africa and Europe Middle East relations are also addressed This book will be of great interest to students of European Security European politics and IR in general A Human Security Doctrine for Europe Marlies Glasius, Mary Kaldor, 2006-01-16 A Human Security Doctrine for Europe explores the actual needs of individual people in conflict areas rather than using a conventional institutional or geo political perspectives This new volume proposes that Europe should develop a new kind of human security capability that involves the military the police and civilians all working together to enforce law rather than to fight wars It argues that threats such as weapons of mass destruction or terrorism can only be countered if we address the insecurity of people in all parts of the world Many people in the world lead intolerably insecure lives In large parts of Africa the Balkans Central Asia and the Middle East men and women live in daily fear of violent attacks kidnapping rape extortion robbery or trafficking The existence of large military apparatuses does not create security indeed as in Iraq the use of regular military forces may only make things worse This stimulating study includes two chapters setting out the changed global context and proposing new approaches to security five regional studies on the Balkans the Great Lakes Region the Middle East the South Caucasus and West Africa four studies on different aspects of EU security policy including the legal setting the role of women operational principles and the role of the new member states four operational studies on capabilities resources and institutional embedding Written by a diverse team of international experts this book will be of strong interest to students and researchers of security studies peace studies human rights and international relations **Uncertain Europe** Martin

Security in 21st Century Europe Andrew Cottey, 2012-11-19 Fully revised and updated the second edition of this leading textbook provides a systematic assessment of security in contemporary Europe The book examines the changing character of security and assesses the extent of the threats posed by different challenges as well as the policy dilemmas involved in responding to these concerns The nature of security in Europe has been transformed in recent years Andrew Cottey argues that this is a result of two key developments the emergence of a security community a zone of peace where war is inconceivable across much of Europe and the presence of new security threats such as terrorism and energy dependence Set in the context of the rising power of non Western states and the continuing fall out from the global economic crisis this text provides a comprehensive analysis of Europe s new security challenges Europe s traditional problem of war between states is being displaced by a new and equally daunting set of security challenges While major war within Europe remains unlikely the 2008 Georgia war and the 2011 Libya war were reminders that violent conflicts are still prevalent on Europe s periphery and can pose major challenges for European governments NATO and the EU At the same time terrorism nuclear proliferation as well as non military problems like mass migration and climate change threaten Europe s security This text is the perfect companion for advanced undergraduate and Master s level courses on European security whether within courses in Security studies European studies or International Relations New to this Edition New framework for analysing European security Highly topical issues covered including Arab Spring rise of BRIC countries terrorism and European energy dependence

Strategic Cultures in Europe Heiko Biehl, Bastian Giegerich, Alexandra Jonas, 2013-04-09 European countries work together in crisis management conflict prevention and many other aspects of security and defence policy Closer cooperation in this policy arena seems to be the only viable way forward to address contemporary security challenges Yet despite the repeated interaction fundamental assumptions about security and defence remain remarkably distinct across European nations This book offers a comparative analysis of the security and defence policies of all 27 EU member states and Turkey drawing on the concept of strategic culture in order to examine the chances and obstacles for closer security and defence cooperation across the continent Along the lines of a consistent analytical framework international experts provide case studies of the current security and defence policies in Europe as well as their historical and cultural roots

Germany and Europe Graf Harry Kessler, 1923

The European Union as a Global Conflict Manager Richard G. Whitman, Stefan Wolff, 2012 This book provides a comprehensive assessment of how the EU has performed in facilitating mediation conflict resolution and peacebuilding across the globe

European Security Professor Bjørn Møller, 2012-12-28 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it

Ontological Insecurity in the European Union Catarina Kinnvall, Ian Manners, Jennifer Mitzen, 2020-05-21 The European Union EU faces many crises and risks to its security and existence While few of them threaten the lives of EU citizens they all create a sense of anxiety and insecurity about the future for many ordinary Europeans This comprehensive volume explores the concept of ontological security which was introduced into international relations over a decade ago to better understand the security of being found in feelings of fear anxiety crisis and threat to wellbeing The authors make use of this concept to explore how narratives of European integration have been part of public discourses in the post war period and how reconciliation dynamics national biographical narratives and memory politics have been enacted to create ontological security Within this context they also discuss the anxiety of the remainers in the Brexit referendum and the consequences of its failure to address the ontological anxieties and insecurities

of remain voters The book also explores how European security firms market ontological security and provide an ontological security inspired reading of the EU's relations with post communist states the EU and NATO's engagement with hybrid threats and the EU as an anxious community This book was originally published as a special issue of the journal European Security Disconcerted Europe Alexander Moens,2019-03-11 Four years after the end of the Cold War the United States and its European allies have still not agreed on a new security system to deal with war in Yugoslavia a restless eastern Europe and an unstable Russia The contributors to this timely volume evaluate reforms in the North Atlantic Alliance the new European Union and the Conference on Security and Cooperation in Europe CSCE They also explore a number of critical issues Why is it that NATO cannot end the Yugoslav conflict Why do the Americans and West Europeans quarrel over a European Security and Defense Identity Why is it that the states of Central and Eastern Europe cannot simply join NATO Is the CSCE becoming the pan European security organization that will bear responsibility for preventing or managing future conflicts The book offers careful analysis of the pivotal years of reform between 1989 and 1992 In the first section the contributors assess those developments from the viewpoint of the key institutions NATO CSCE the European Union and its security arm the Western European Union WEU They then examine the policies of the key allies the United States the United Kingdom Germany and France The book concludes that the current problems in European security affairs are directly explained by the discord divergences and contradictions that have characterized the crucial formative years of these newly significant organizations In the closing chapter the editors suggest pragmatic political initiatives for strengthening these groups in the near future *Security Integration in Europe* Mai'a Cross,2013-04-16 At a time when many observers question the EU's ability to achieve integration of any significance and indeed Europeans themselves appear disillusioned Mai'a K Davis Cross argues that the EU has made remarkable advances in security integration in both its external and internal dimensions Moreover internal security integration such as dealing with terrorism immigration cross border crime and drug and human trafficking has made even greater progress with dismantling certain barriers that previously stood at the core of traditional state sovereignty Such unprecedented collaboration has become possible thanks to knowledge based transnational networks or epistemic communities of ambassadors military generals scientists and other experts who supersede national governments in the diplomacy of security decision making and are making headway at remarkable speed by virtue of their shared expertise common culture professional norms and frequent meetings Cross brings together nearly 80 personal interviews and a host of recent government documents over the course of five separate case studies to provide a microsociological account of how governance really works in today's EU and what future role it is likely to play in the international environment This is an ambitious work which deals not only with European security and defense but also has much to say about the policy making process of the EU in general Ezra Suleiman Princeton University European Security, Terrorism and Intelligence C. Kaunert,S. Leonard,2013-05-07 The EU has long been seen as confederation that has failed to

assert itself effectively on the international stage In this collection a series of experts discuss how the EU has shed its reputation as a weak international actor in light of its policies on police cooperation and intelligence sharing as part of the global effort to combat terrorism American Monthly Review of Reviews Albert Shaw,1926
