Seeing Things:

Seeing Things Alan Louis Ackerman, 2011-01-01 A technological revolution has changed the way we see things The storytelling media employed by Pixar Animation Studios Samuel Beckett and William Shakespeare differ greatly yet these creators share a collective fascination with the nebulous boundary between material objects and our imaginative selves How do the acts of seeing and believing remain linked Alan Ackerman charts the dynamic history of interactions between showing and knowing in *Seeing Things* a richly interdisciplinary study which illuminates changing modes of perception and modern representational media *Seeing Things* demonstrates that the airy nothings of *A Midsummer Night's Dream* the Ghost in Hamlet and soulless bodies in Beckett's media experiments alongside *Toy Story*'s digitally animated toys all serve to illustrate the modern problem of visualizing as Hamlet put it that within which passes show Ackerman carefully analyses such ghostly appearances and disappearances across cultural forms and contexts from the early modern period to the present investigating the tension between our distrust of shadows and our abiding desire to believe in invisible realities *Seeing Things* provides a fresh and surprising cultural history through theatrical verbal pictorial and cinematic representations

Seeing Things as They Are Duncan Reyburn, 2017-08-31 The jovial journalist philosopher and theologian G K Chesterton felt that the world was almost always in permanent danger of being misjudged or even overlooked and so the pursuit of understanding insight and awareness was his perpetual preoccupation Being sensitive to the boundaries and possibilities of perception he believed that it really was possible albeit in a limited way to see things as they are Duncan Reyburn marrying Chesterton's unique perspective with the discipline of philosophical hermeneutics aims to outline what Chesterton can teach us about reading interpreting and participating in the drama of meaning as it unfolds before us in words and in the world Chesterton's unique interpretive approach seems to be the implicit fascination of all Chesterton scholarship to date and yet this book is the first to comprehensively focus on the issue By taking Chesterton back to his philosophical roots via his marginalia his approach to literary criticism his Platonist Thomist metaphysics and his Roman Catholic theology Reyburn explicitly and compellingly tackles the philosophical assumptions and goals that underpin his unique posture towards reality
