Model Theory And Modules:

Model Theory and Modules Mike Prest, 2014-05-14 Professor Prest is the first to address the topic of the development of the interplay between model theory and the theory of modules In recent years the relationship between model theory and other branches of mathematics has led to many profound and intriguing results This self contained introduction to the subject introduces the requisite model theory and module theory as it is needed It then develops the basic ideas of determining what can be said about modules using the information that may be expressed in first order language Later chapters discuss stability theoretic aspects of modules and structure and classification theorems over various types of rings and for certain classes of modules *Model Theory and Modules* M. Prest, 1988 In recent years the interplay between model theory and other branches of mathematics has led to many deep and intriguing results In this the first book on the topic the theme is the interplay between model theory and the theory of modules The book is intended to be a self contained introduction to the subject and introduces the requisite model theory and module theory as it is needed Dr Prest develops the basic ideas concerning what can be said about modules using the information which may be expressed in a first order language Later chapters discuss stability theoretic aspects of module **Model Theory and Modules** Mike Prest, 1988-02-25 In recent years the interplay between model theory and other branches of mathematics has led to many deep and intriguing results In this the first book on the topic the theme is the interplay between model theory and the theory of modules The book is intended to be a self contained introduction to the subject and introduces the requisite model theory and module theory as it is needed Dr Prest develops the basic ideas concerning what can be said about modules using the information which may be expressed in a first order language Later chapters discuss stability theoretic aspects of modules and structure and classification theorems over various types of rings and for certain classes of modules Both algebraists and logicians will enjoy this account of an area in which algebra and model theory interact in a significant way The book includes numerous examples and exercises and consequently will make an ideal introduction for graduate students coming to this subject for the first time **Model Theory of Modules, Algebras and Categories** Alberto Facchini, Lorna Gregory, Sonia L'Innocente, Marcus Tressl, 2019-05-31 This volume contains the proceedings of the international conference Model Theory of Modules Algebras and Categories held from July 28 August 2 2017 at the Ettore Majorana Foundation and Centre for Scientific Culture in Erice Italy Papers contained in this volume cover recent developments in model theory module theory and category theory and their intersection *Functor Categories, Model Theory, Algebraic Analysis and Constructive Methods* Alexander Martsinkovsky, 2024-05-04 This volume comprises selected contributions by the participants of the second Functor Categories Model Theory Algebraic Analysis and Constructive Methods conference which took place at the University of Almer a Spain in July 2022 The conference was devoted to several seemingly unrelated fields functor categories model theory of modules algebraic analysis including linear control systems and constructive category theory to mention just

a few The fact that these fields are actually related is a very recent realization The connections between these disciplines are changing in real time and the goal of this volume is to provide an initial reference point for this emerging interdisciplinary field Besides research articles the volume includes two extended lectures one on constructive methods in algebraic analysis and the other on the functorial approach to algebraic systems theory Hence in addition to its interest for researchers the volume will also be an invaluable resource for newcomers

Advances in Algebra and Model Theory M Droste, R. Gobel, 1998-01-29 Contains 25 surveys in algebra and model theory all written by leading experts in the field The surveys are based around talks given at conferences held in Essen 1994 and Dresden 1995 Each contribution is written in such a way as to highlight the ideas that were discussed at the conferences and also to stimulate open research problems in a form accessible to the whole mathematical community The topics include field and ring theory as well as groups ordered algebraic structure and their relationship to model theory Several papers deal with infinite permutation groups abelian groups modules and their relatives and representations Model theoretic aspects include quantifier elimination in skew fields Hilbert's 17th problem \aleph_0 categorical structures and Boolean algebras Moreover symmetry questions and automorphism groups of orders are covered This work contains 25 surveys in algebra and model theory each is written in such a way as to highlight the ideas that were discussed at Conferences and also to stimulate open research problems in a form accessible to the whole mathematical community

Some Model Theory of Modules Ivo Herzog, 1991 Model Theoretic Algebra With Particular Emphasis on Fields, Rings, Modules Christian U Jensen, 2022-03-10 This volume highlights the links between model theory and algebra The work contains a definitive account of algebraically compact modules a topic of central importance for both module and model theory Using concrete examples particular emphasis is given to model theoretic concepts such as axiomizability Pure mathematicians especially algebraists ring theorists logicians model theorists and representation theorists should find this an absorbing and stimulating book
