Recycling conserves natural resources like timber, water, and minerals. By reusing materials, we reduce the need for new raw materials, preserving these resources for future generations.

Body Paragraph 2: Reducing Pollution

Recycling helps reduce pollution caused by waste. It decreases the need for landfill space and lowers greenhouse gas emissions from waste decomposition and industrial production.

Body Paragraph 3: Saving Energy

Manufacturing products from recycled materials requires less energy than producing them from new materials. This energy saving helps reduce the overall environmental footprint of production processes.
