

Narrative Paradigm

The Narrative Paradigm theory highlights the power of storytelling in communication, emphasizing coherence and fidelity as persuasive criteria. It suggests that humans are natural storytellers and consumers. This theory finds practical applications in marketing and political communication, enhancing persuasion through relatable narratives while facing criticisms for its potential subjectivity.

David K. Danow

Models Of Narrative:

Models of Narrative David K. Danow, 1997-01 When one reads Danow's work one grows eager to re-read the works he examines. Not only is his scholarship vast, his management of it is brilliant. Developing a theory of modeling, he develops a theory of knowing, an epistemology that has implications for any intellectual endeavor. His investigation of this important area of the humanities, moreover, is not removed from the life of humanity as is often the case with scholarly works. The linkage between the interest in literature and the interest in life is implicit throughout his book and at times is quite explicit. Danow teaches us not only how to better understand literature but how to better understand what is at stake in the study of it. David Patterson, Distinguished Professor of Russian Literature, University of Memphis. *Models of Narrative* David K. Danow, 1996-12-15 The role of models in works of literature has been largely overlooked by literary scholars. *Models of Narrative* undertakes to focus on this often central role. In analyzing the concept and practice of literary modeling, Danow leads the reader on a search for order, patterns, and familiar concepts in literary works. Addressing a wide array of literary works by such luminaries as Dostoevsky, Tolstoy, Garcia Marquez, and Hawthorne, Danow examines these works in terms of narrative universals such as time, space, and speech. In addition, he distinguishes between theory and practice, treating the notion of literal and figural relations and offering concrete literary criticism. *Composition and Rhetoric Based on Literary Models* Rose Mary, Kavana, Arthur Beatty, 1902

The World in the Model Mary S. Morgan, 2012-09-17 During the last two centuries, the way economic science is done has changed radically; it has become a social science based on mathematical models in place of words. This book describes and analyses that change both historically and philosophically, using a series of case studies to illuminate the nature and the implications of these changes. It is not a technical book; it is written for the intelligent person who wants to understand how economics works from the inside out. This book will be of interest to economists and science studies scholars, historians, sociologists, and philosophers of science. But it also aims at a wider readership in the public intellectual sphere, building on the current interest in all things economic and on the recent failure of the so-called economic model which has shaped our beliefs and the world we live in. *Composition from Models* William John Alexander, 1894
