

SEXUAL NATURE/SEXUAL CULTURE

An Edited Book

By

Paul R. Abramson and Steven D. Pinkerton
University of Chicago Press, 1995

In this comprehensive multi-disciplinary study of human sexuality, an international team of scholars looks at the influences of nature and nurture, biology and culture, and sex and gender in the sexual experiences of humans and other primates. The central proposition is that sexual pleasure is the primary motivational force behind human sexuality - and that reproduction is simply a by-product of the pleurability of sex. The implications of this proposition are then examined at the individual, societal, and cultural levels.
