**Sustainable Development of Modern Digital Economy** Julia V. Ragulina, Arutyun A. Khachatryan, Arsen S. Abdulkadyrov, Zoya Sh. Babaeva, 2021-06-30 The digital economy is a new direction in which the modern global economic system is now heading This book seeks to adapt the digital economy concept to the priorities of humanity including the implementation of global development goals The authors develop and substantiate scientific and methodological criteria for assessing the sustainability of the modern digital economy and offer several concrete recommendations for improving the concept of the digital economy by incorporating global development goals

[Modelling Sustainable Development](#) Valentina Bosetti, Reyer Gerlagh, Stefan Schleicher, 2009 This insightful book explores the issue of sustainable development in its more operative and applied sense Although a great deal

of research has addressed potential interpretations and definitions of sustainable development much of this work is too abstract to offer policy makers and researchers the feasible and effective guidelines they require This book redresses the balance The authors highlight how various indicators and aggregate measures can be included in models that are used for decision making support and sustainability assessment They also demonstrate the importance of identifying practical means to assess whether policy proposals specific decisions or targeted scenarios are sustainable With discussions of basic concepts relevant to understanding applied sustainability analysis such as definitions of costs and revenue recycling this book provides policy makers researchers and graduate students with feasible and effective principles for measuring sustainable development

Modelling for Population and Sustainable Development A. J. Gilbert, Leon C. Braat, 1991 **Sustainable Development Concepts** John Pezzey, 1992 Concepts The growing recognition of sustainable development as a policy goal Purpose of this paper Methodology used Structure of the paper Some issues to be addressed Measuring the economy and the environment Definitions of growth development and sustainability concepts Optimal control and sustainability Applications Economic growth and the environment balancing consumption and clean up expenditure Non renewable resources I sustainability and the discount rate Non renewable resource II sustainability and environmental dependence combined Non renewable resources III the role of investment and technological limits to growth Renewable resources poverty survival and outside assistance Income distribution and sustainable development Are discount rates too high Information and uncertainty Operationality putting the ideas into practice Conclusions and suggestions for further work **Surface Modeling**

Tian-Xiang Yue, 2011-02-04 Although GIS provides powerful functionality for spatial analysis data overlay and storage these spatially oriented systems lack the ability to represent temporal dynamics which is a major impediment to its use in surface modeling However rapid development of computing technology in recent years has made real time spatial analysis and real time data visualization become realizable Based on newly developed methods Surface Modeling High Accuracy and High Speed Methods explores solutions to big error and slow efficiency problems two critical challenges that have long plagued those working in with geographical information system GIS and computer aided design CAD By developing high accuracy and high speed methods for surface modeling the book builds a bridge between the mathematical oriented theory of surface modeling and the user oriented application where the user is actually able to retrieve information on the method itself The author examines a novel method of high accuracy surface modeling HASM in terms of the fundamental theorem of surfaces He then analyzes the coefficient matrix and develops an adaptive method of HASM HASM AM a multi grade method of HASM HASM MG and an adjustment method of HASM HASM AD He uses numerical tests and real world studies to demonstrate that HASM AM HASM MG and HASM AD have highly accelerated computational speed especially for simulations with huge computational work Building on this the book discusses a HASM based method for dynamic simulation HASM FDS and then applies HASM methods to simulate terrains climate change ecosystem change land cover and soil properties It demonstrates

HASM s potential for simulating population distribution human carrying capacity ecosystem services ecological diversity change detection and wind velocity The book concludes with a discussion of the problems that exist in surface modeling on a global level and evaluates possible solutions to these problems
