Models Of Short Term Memory:

Models Of Short-Term Memory Susan E. Gathercole, 2013-06-20 This volume offers a collection of theoretical perspectives in the area of short term memory It contains overviews of models of short term memory with particular emphasis placed on the detailed description of the functioning of the models The volume represents both computational approaches and theories expressed in more traditional verbal form Models represented in the volume also cover both developmental and neuropsychological perspectives on short term memory This book should appeal to active researchers in the area of memory to graduate students and to academics who wish to update their knowledge of this fast developing area of research and theory Final year undergraduates may also find this book of interest

Repetition and Rehearsal

Mechanisms in Models for Short-term Memory Robert A. Bjork, 1969 The paper presents a theoretical discussion of the probable general mechanisms of repetition and rehearsal in short term memory It points out the implications of the various mechanisms and evaluates their relative adequacies It examines questions on the representation of rehearsal in models for short term memory Author

Models of Thought Herbert Alexander Simon, 1979-01-01 Nobel Laureate Herbert A Simon has in the past quarter century been in the front line of the information processing revolution in fact to a remarkable extent his and his colleagues contributions have written the history of that revolution in cognitive psychology Research in this burgeoning new branch of knowledge seeks to describe with precision the workings of the human mind in terms of a small number of basic mechanisms organized into strategies Newly developed computer languages express theories of mental processes so that computers can then simulate the predicted human behavior This book brings together papers dating from the start of Simon's career to the present Its focus is on modeling the chief components of human cognition and on testing these models experimentally After considering basic structural elements of the human information processing system especially search selective attention and storage in memory Simon builds from these components a system capable of solving problems inducing rules and concepts perceiving and understanding These essays describe a relatively austere simple and unified processing system capable of highly complex and various tasks They provide strong evidence for an explanation of human thinking in terms of basic information processes

Interactions Between Short-Term and Long-Term Memory in the Verbal Domain Annabel Thorn, Mike Page, 2008-08-15 The relationship between short and long term memory systems is an issue of central concern to memory theorists This book is the first single publication to comprehensively address this key issue

Models of Human Memory Donald A. Norman, 1970 *Models of Human Memory* Donald A. Norman, 2013-10-22 *Models of Human Memory* provides an overview of the state of knowledge on human memory models The book begins with an introductory chapter on the basic stages of the memory system and the historical roots of memory models The remaining chapters are organized into five parts Part I on memory systems covers topics such as a system for perception and memory multi trace strength theory of memory and a model for postperceptual verbal memory that postulates

a single memory store with multiple copies called replicas created in memory by rehearsal processes Part II presents studies phoneme storage and word recognition Part III on memory for associations examines the storage retrieval theory for the memorizing processes and presents simple model of short term memory STM for paired associates Part IV on storage and retrieval mechanisms deals with mechanisms of repetition and rehearsal in short term memory models of recall and recognition and memory search models Part V presents a theory of human long term associative memory and examines conceptual and methodological interactions between information processing investigations of cognitive activity and attempts to build models of memory

The chapters of this volume evaluate models of the short term retention of knowledge conceptual knowledge autobiographical knowledge transitory mental representations the neurobiological basis of memory and age related changes in human memory **Learning, Memory, and Conceptual Processes** Walter Kintsch,1970 **Models of Working Memory** Akira Miyake,Priti Shah,1999-04-13 This volume offers a much needed forum for comparing and contrasting existing models of working memory **Models of Short-Term Memory: A Critical Review** Richard S. Saunders,M. Gregory Smith,Warren H. Teichner,NEW MEXICO STATE UNIV UNIVERSITY PARK DEPT OF PSYCHOLOGY.,1974 Recent models of short term memory are critically reviewed for their possible applicability to training techniques Although many of the models provide reasonable ad hoc descriptions of memory data none of them allow for an a priori quantitative prediction At a qualitative level they say no more than the empirical phenomena indicate qualitatively This may not be a serious lack from the viewpoint of the purposes for which the models were developed but it does provide a lack from the viewpoint of use for training Suggestions are made toward further research and toward the possibility of developing models aimed at specific classes of training **Working Memory and Academic Learning** Milton J. Dehn,2011-01-04 Equipping school and child psychologists and neuropsychologists with critical information on the role of working memory in learning and achievement Working Memory and Academic Learning offers guidance on assessment tools interventions and current evidence based best practices Its specific step by step guidance and hands on case studies enables you to identify how working memory relates to academic attainment and how to apply this knowledge in professional practice *Functional Aspects of Human Memory* Royal Society (Great Britain).
