## **Modern Classicism:**

**Post-modernism** Charles Jencks, 1987 Describes the return to a new classical style within art and architecture Includes 350 illustrations of paintings sculpture and architecture

**Classical Styles in Modern Architecture** Thomas Doremus, 1994 Classical Styles in Modern Architecture From the Colonnade to Disjunctured Space Thomas L Doremus The rise of Post modernism in late twentieth century architecture has kindled a new intense debate about the viability of classical styles in the modern city a debate fueled by the Preservation movement with many arguments heard on both sides Unfortunately too often these arguments have been couched in dense theoretical terms and illustrated with highly technical documentation Now in Classical Styles in Architecture acclaimed architectural theorist Thomas L Doremus has avoided jargon and arcane language to provide a clear examination of the ways in which modernism is different from classicism At the same time he demonstrates how each can be accommodated in contemporary life In brilliant lucid prose he shows that the development of modern architecture was a much more gradual process in the United States than it was in Europe and expounds the theory that modernism is not a rejection but rather a democratization of classical architecture with elements from each given equal value rather than subordinated in a hierarchical system Within this inclusionary view he writes it is possible to adapt modernist tenets to the information age and develop a viable approach to future design Lavishly illustrated and impeccably credentialed this book includes Photographs that show and reference ordinary everyday buildings and civic structures along with some of the more familiar monuments of architecture A historical section that identifies the growth of democratic governments as one of the foundations of modernism Focusing on the United States rather than on the socialist societies of Europe it is thus more relevant to the contemporary political situation Discussions of leading theorists such as Giedion Pevsner and Venturi as well as of key buildings and architects drawn from the past one hundred years Technological cultural and formal analyses of both classicism and modernism A discursive rather than scholarly review of why buildings look the way they do Classical Styles in Modern Architecture is certain to expand the debate on the subject and possibly even provoke controversy Given the impact that many post modern projects have had on the fabric of most American cities however it is bound to be of interest to any reader concerned about the future of ture in the United States in the ways our cities will look and consequently how we will live in them

Post-modern Classicism Charles Jencks, 1980 Modern Classicism Robert A. M. Stern, Raymond Gastil, 1988

**Modern Classicism** Robert A. M. Stern, 1988 Examines the role of Classicism in modern architecture providing a brief discussion of Classicism through history and the changes brought to it by technology and offering interviews with contemporary Classical architects

classical principles and ideas were disseminated and received across the globe By addressing a number of contentious or unresolved issues highlighted in some historical surveys of architecture the chapters presented in this volume question long held assumptions about the notion of a universally accepted classical tradition and its broadly Euro centric perspective Featuring thirty two chapters written by international scholars from China Europe Turkey North America Mexico Australia and New Zealand the book is divided into four sections 1 Transmission and re conceptualisation of classical architecture 2 Classical influence through colonialism political ideology and religious conversion 3 Historiographical surveys of geographical regions and 4 Visual and textual discourses This fourfold arrangement of chapters provides a coherent structure to accommodate different perspectives of classical reception across the world and their geographical ethnographic ideological symbolic social and cultural contexts Essays cover a wide geography and include studies in Italy France England Scotland the Nordic countries Greece Austria Portugal Romania Germany Poland India Singapore China the USA Mexico Brazil New Zealand and Australia Other essays in the volume focus on thematic issues or topics pertaining to classical architecture such as ornament spolia humanism nature moderation decorum heresy and taste An essential reference guide The Routledge Handbook on the Reception of Classical Architecture makes a major contribution to the study of architectural history in a new global context *Lateness and Modernism* Sarah Collins,2019-08 Examines the role of musical figures within late modernism presenting a new understanding of the politics and aesthetics of lateness [French Classicism ?](#) Charles Henry Conrad Wright,1920 **Postmodernism: A Bibliography, 1926-1994** Deborah L. deconstruction leadership and values these topics have been at the forefront of contemporary intellectual and cultural debate and are likely to remain so through the 1990s Participants in the debate can usefully enlarge the perspective to a comparison between the Greco Roman world and contemporary society In this thought provoking work a noted classics scholar tests the ancient modern comparison showing what it can add to the contemporary debates and what its limitations are Writing for intellectually adventurous readers Galinsky explores Greece and Rome as multicultural societies debates the merits of classicism in postmodern architecture discusses the reign of Augustus in terms of modern leadership theories and investigates the modern obsession with finding parallels between the supposed decline and fall of Rome and the decay of U S society Within these discussions Galinsky shows the continuing vitality of the classical tradition in the contemporary world The Greek and Roman civilizations have provided us not only with models for conscious adaptation but also points for radical departures This ability to change and innovate from classical models is crucial Galinsky maintains It creates a reciprocal process whereby contemporary issues are projected into the past while aspects of the ancient world are redefined in terms of current approaches These essays result in a balanced assessment and stimulating restatement of some major issues in both contemporary U S society and the Greco Roman world The book which speaks to a wide interdisciplinary audience is based on a series of lectures that Galinsky gave as a national visiting scholar for Phi Beta Kappa It concludes with a discussion of the role of classical studies in the United States today
