Meaning The Dynamic Turn:

Meaning: the Dynamic Turn Jaroslav Peregrin, 2021-07-26 In recent decades many theories of formal semantics of natural language have undergone what can be called a dynamic turn they have moved from treating language as a static system to considering it in action and to taking meanings as crucially involving context change potentials The theories however usually concentrate much more on the hows of the turn than on its whys and as a result the conceptual foundations of dynamic semantics are much less elaborated than its technical side This book based on a conference held in Prague in September 2001 is a contribution to filling this gap it consists of papers addressing from various sides the foundational questions of the dynamic theories of meaning It includes contributions of writers who are commonly held as authorities concerning the turn who however here concentrate more on the why s than on the how s of dynamic semantics Hence the book should be of interest both for those who want to know what the turn is about and for those who are not satisfied with knowing the technical side of dynamic semantics and want to know its point

Philosophy of Logic , 2006-11-29 The papers presented in this volume examine topics of central interest in contemporary philosophy of logic They include reflections on the nature of logic and its relevance for philosophy today and explore in depth developments in informal logic and the relation of informal to symbolic logic mathematical metatheory and the limiting metatheorems modal logic many valued logic relevance and paraconsistent logic free logics extensional v intensional logics the logic of fiction epistemic logic formal logical and semantic paradoxes the concept of truth the formal theory of entailment objectual and substitutional interpretation of the quantifiers infinity and domain constraints the L wenheim Skolem theorem and Skolem paradox vagueness modal realism v actualism counterfactuals and the logic of causation applications of logic and mathematics to the physical sciences logically possible worlds and counterpart semantics and the legacy of Hilbert s program and logicism The handbook is meant to be both a compendium of new work in symbolic logic and an authoritative resource for students and researchers a book to be consulted for specific information about recent developments in logic and to be read with pleasure for its technical acumen and philosophical insights Written by leading logicians and philosophers Comprehensive authoritative coverage of all major areas of contemporary research in symbolic logic Clear in depth expositions of technical detail Progressive organization from general considerations to informal to symbolic logic to nonclassical logics Presents current work in symbolic logic within a unified framework Accessible to students engaging for experts and professionals Insightful philosophical discussions of all aspects of logic Useful bibliographies in every chapter

Descriptions and Beyond Marga Reimer, Anne Bezuidenhout, 2004 The authors present a collection of brand new essays on important topics at the intersection of philosophy and linguistics

Sense and Sensitivity David I. Beaver, Brady Z. Clark, 2009-01-30 Sense and Sensitivity advances a novel research proposal in the nascent field of formal pragmatics exploring in detail the semantics and pragmatics of focus in natural language discourse The authors develop a new account of focus sensitivity and show that what

has hitherto been regarded as a uniform phenomenon in fact results from three different mechanisms The book Makes a major contribution to ongoing research in the area of focus sensitivity a field exploring interactions between sound and meaning specifically the dependency some words have on the effects of focus such as she only LIKES me i e nothing deeper compared to she only likes ME i e nobody else Discusses the features of the QFC theory Quasi association Free association and Conventional association a new account of focus implying a tripartite typology of focus sensitive expressions Presents novel cross linguistic data on focus and focus sensitivity that will be relevant across a range of linguistic sub fields semantics and pragmatics syntax and intonational phonology Concludes with a case study of exclusives like only arguing that the entire existing literature has missed crucial generalizations and for the first time explaining the focus sensitivity of these expressions in terms of their meaning and discourse function Johan van Benthem on Logic and Information Dynamics

Alexandru Baltag, Sonja Smets, 2014-08-27 This book illustrates the program of Logical Informational Dynamics Rational agents exploit the information available in the world in delicate ways adopt a wide range of epistemic attitudes and in that process constantly change the world itself Logical Informational Dynamics is about logical systems putting such activities at center stage focusing on the events by which we acquire information and change attitudes Its contributions show many current logics of information and change at work often in multi agent settings where social behavior is essential and often stressing Johan van Benthem's pioneering work in establishing this program However this is not a Festschrift but a rich tapestry for a field with a wealth of strands of its own The reader will see the state of the art in such topics as information update belief change preference learning over time and strategic interaction in games Moreover no tight boundary has been enforced and some chapters add more general mathematical or philosophical foundations or links to current trends in computer science The theme of this book lies at the interface of many disciplines Logic is the main methodology but the various chapters cross easily between mathematics computer science philosophy linguistics cognitive and social sciences while also ranging from pure theory to empirical work Accordingly the authors of this book represent a wide variety of original thinkers from different research communities And their interconnected themes challenge at the same time how we think of logic philosophy and computation Thus very much in line with van Benthem's work over many decades the volume shows how all these disciplines form a natural unity in the perspective of dynamic logicians broadly conceived exploring their new themes today And at the same time in doing so it offers a broader conception of logic with a certain grandeur moving its horizons beyond the traditional study of consequence relations **Presupposition and Implicature in Compositional**

Semantics U. Sauerland, P. Stateva, 2007-05-10 All humans can interpret sentences of their native language quickly and without effort Working from the perspective of generative grammar the contributors to this volume investigate three mental mechanisms widely assumed to underlie this ability compositional semantics implicature computation and presupposition computation *Innovations in the History of Analytical Philosophy* Sandra Lapointe, Christopher Pincock, 2017-09-18 This

book offers new perspectives on the history of analytical philosophy surveying recent scholarship on the philosophical study of mind language logic and reality over the course of the last 200 years Each chapter contributes to a broader engagement with a wider range of figures topics and disciplines outside of philosophy than has been traditionally associated with the history of analytical philosophy The book acquaints readers with new aspects of analytical philosophy s revolutionary past while engaging in a much needed methodological reflection It questions the meaning associated with talk of analytic philosophy and offers new perspective on its development It offers original studies on a range of topics including in the philosophy of language and mind logic metaphysics and the philosophy of mathematics and figures whose relevance when they is not already established as in the case of Russell Moore and Wittgenstein are just now beginning to become the topic of mainstream literature Franz Brentano William James Susan Langer as well as the German and British logicians of the nineteenth century

Meaning, Intentions, and Argumentation Kepa Korta,Joana Garmendia,2008 What is the relationship between words and reality Which are the best ways to convince or persuade other people Besides philosophy and grammar ancient Greeks developed rhetoric to answer these questions The twentieth century brought the birth of semantics and pragmatics for a systematic study of linguistic meaning and linguistic acts Meaning Intentions and Argumentation brings together the work of leading contemporary scholars approaching those issues from various perspectives from the old disciplines of philosophy and rhetoric to the newest thinking on semantics and pragmatics to illuminate crucial aspects of meaning communication argumentation and persuasion
