New British Architecture:

New Directions in British Architecture Royston Landau, 1968 *New Architecture in Britain* Ken Powell, 2006

Architects increasingly operate on a global scene and just as numerous British architects have proved highly successful at winning projects abroad so architects from Europe the United States and the Far East are making their mark in Britain One thinks for example of Daniel Libeskind's Imperial War Museum and Tadao Ando's new square and pavilion project both in Manchester or of Frank Gehry's Cancer Care Centre in Dundee Well known British practices such as Future Systems Alsop Architects and Nicholas Grimshaw Partners also inevitably feature prominently in the exciting international story of the country's recent architectural renaissance but so too do newer smaller practices including many based outside the capital This book engagingly describes and illustrates over 100 outstanding projects both large and small floor around Britain none completed earlier than 2001 and some still under construction or at planning stage Covering every conceivable building type from houses offices and department stores to theatres heritage sites and museums this book makes a forceful contribution to the continuing debate about the role of architecture in forging a new environment and underpinning the growth of a healthy society

Neue Britische Architektur in Deutschland Michael Jenner, 2000 The close relationship between the British and German architectural scenes developed over two centuries is a showcase for the work of British architects working in Germany This stunning volume published to coincide with the opening in July 2000 of the new British Embassy in Berlin designed by Michael Wilford celebrates the range and excellence of new British architecture in Germany as an ongoing success Since the 18th century British architectural life has been enriched by great German figures such as Prince Albert of Saxe Coburg Gotha the architects Gropius and Mendelsohn and the architectural critic Nikolaus Pevsner British architecture in the fullest sense of the term arrived in Germany in 1977 when the London partnership of Stirling and Wilford won the competition for the new art gallery in Stuttgart This milestone set the scene for British architects and German clients to work together consistently producing a model for international cooperation as well as a series of stunning buildings

A Short History of British Architecture Simon Jenkins, 2024-11-07 Provocative elegant intriguing Jenkins is a bold imaginative writer brilliant at challenging old assumptions and encouraging you to look at British architecture in a new light Rory Stewart The story of Britain is revealed through its buildings and yet the language of architecture is a mystery to all but a few In this enlightening history spanning castles and cathedrals to factories and railway stations Jenkins translates the hidden narratives infused in the facades we walk past every day Britain's history has been formed by its politics religion and society and these influences can be seen in the architectural styles that have shaped its landscape From pre Roman and the Middle Ages to the Renaissance and the Industrial Revolution Classical and Gothic styles surged and retreated from favour only to then be challenged by a new player Modernism a style that reflected the stunning technological advances of the second half of the twentieth century In this narrative history Simon Jenkins the bestselling champion of our national heritage

introduces us to the singular eccentric and sometimes rather ordinary characters who shaped Britain Jenkins teaches readers to see the world anew demystifying the elitist language of architecture so that we can all appreciate the buildings around us
