Reengineering The 2010 Census Risks And Challenges:

Reengineering the 2010 Census National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Research on Future Census Methods, 2004-04-25 At the request of the U S Census Bureau the National Research Council's Committee on National Statistics established the Panel on Research on Future Census Methods to review the early planning process for the 2010 census This new report documents the panel's strong support for the major aims of the Census Bureau's emerging plan for 2010 At the same time it notes the considerable challenges that must be overcome if the bureau's innovations are to be successful The panel agrees with the Census Bureau that implementation of the American Community Survey and with it the separation of the long form from the census process are excellent concepts Moreover it concurs that the critically important Master Address File and TIGER geographic systems are in dire need of comprehensive updating and that new technologies have the potential to improve the accuracy of the count The report identifies the risks and rewards of these and other components of the Census Bureau's plan The report emphasizes the need for the bureau to link its research and evaluation efforts much more closely to operational planning and the importance of funding for a comprehensive and rigorous testing program before 2010 [A Guidebook for Using American Community Survey Data for Transportation Planning](#) National Cooperative Highway Research Program, 2007 Explores incorporating the U S Census Bureau's American Community Survey ACS data into the transportation planning processes at national state metropolitan and local levels The report examines ACS data and products and demonstrates their uses within a wide range of transportation planning applications

Research Methods for Public Administrators Gary Rassel, Suzanne Leland, Zachary Mohr, Elizabethann O'Sullivan, 2020-12-29 Research Methods for Public Administrators contains a thorough overview of research methods and statistical applications for advanced undergraduate and graduate students and practitioners The material is based on established social science methods Concepts and applications are discussed and illustrated with examples from actual research The book covers research design methods of data collection instructions on formulating research plans measurement sampling procedures and statistical applications from basic statistics to more advanced techniques The basics of conducting experiments survey research case studies and focus groups are discussed Data organization management and analysis are also covered as are data analysis and hypothesis testing Descriptive and inferential statistics are discussed and illustrated with examples The book also includes a chapter on obtaining and analyzing secondary data data already collected for other purposes and a chapter on reporting and presenting research results to a variety of audiences This is a general textbook written primarily for students of public administration and practitioners in public and not for profit organizations It includes materials shown to be useful in gathering and assessing information for making decisions and implementing policies The material is discussed at a level to be accessible and with enough detail to be useful New to the seventh edition Additional and expanded material on qualitative research big

data metadata literature reviews and causal inference New material on experiments and experimental research New examples and case studies including those dealing with public policy Expanded material on using computers for data management Information on new NSF and NIH ethics and protection of human subjects requirements for researchers New data sets and Power Point slides for each chapter
