Motion Correction in MR Andre van der Kouwe, Jalal B. Andre, 2022-10-28 Motion Correction in MR Correction of Position Motion and Dynamic Changes Volume Eight provides a comprehensive survey of the state of the art in motion detection and correction in magnetic resonance imaging and magnetic resonance spectroscopy The book describes the problem of correctly and consistently identifying and positioning the organ of

interest and tracking it throughout the scan The basic principles of how image artefacts arise because of position changes during scanning are described along with retrospective and prospective techniques for eliminating these artefacts including classical approaches and methods using machine learning Internal navigator based approaches as well as external systems for estimating motion are also presented along with practical applications in each organ system and each MR modality covered This book provides a technical basis for physicists and engineers to develop motion correction methods giving guidance to technologists and radiologists for incorporating these methods in patient examinations Provides approaches for correcting scans prospectively and retrospectively Shows how motion and secondary effects such as field changes manifest in MR scans as artifacts and subtle biases in quantitative research Gives methods for measuring motion and associated field changes quantifying motion and judging the accuracy of the motion and field estimates
