## **Shadows Three:**

*Shadow Working in Project Management* Joana Bértholo, 2017-07-06 *Shadow Working in Project Management* aims at contributing to our knowledge of all things unconscious and irrational in our behaviour. It takes the form of an empirical research and therefore addresses mostly the tools and techniques available to get in touch with shadow aspects of self and collective to recognize how it manifests, how it can lead to conflict, and ways to address it. From that perspective, it advances on to question the underlying beliefs of current management practices. It explores as well the inherent need for control in projects being those of a professional nature or other ventures. It challenges the strength of the concept of the rational man and its protagonism. Joana Bértholo's work explores the role and nature of the shadow in the context of projects and their management with an emphasis on techniques to address it. Despite being directed to managers and dedicated to the analyses of the managerial discourse, the tools and processes it proposes have universal relevance based on the fact that the shadow is everywhere within everyone from the individual to the global scale.

**A Path of Shadows** Lauren Haney, 2009-10-13 The Gods blessed Lieutenant Bak, head of the Medjay police, with a rare brilliance which is why he is the one to whom his commander turns in a time of need. The explorer Minnakht has vanished into the vast and merciless Egyptian desert or perhaps has strayed perilously close to Queen Maatkare Hatshepsut's well-guarded turquoise mines, and before Bak sails north on a new assignment, he is to seek out the missing man. But evil is traveling with him, and his Medjays in the caravan they accompany eastward. Someone or something is responsible for the strange rash of deaths that is rapidly thinning the numbers of their fellow travelers. A straightforward search for a missing adventurer becomes a twisted knot of treachery and blood, one that threatens to strangle the life from Bak and his men and leave them buried for all eternity beneath the blistering sands.

*Chinese Shadow Theatre* Fan-Pen Li Chen, 2007 In her study of Chinese shadow theatre, Fan-Pen Li Chen documents and corrects misconceptions about this once popular art form. She argues how a traditional folk theatre reflected and subverted Chinese popular culture.

**3D Computer Graphics** Samuel R. Buss, 2003-05-19 This textbook, first published in 2003, emphasizes the fundamentals and the mathematics underlying computer graphics. The minimal prerequisites—a basic knowledge of calculus and vectors plus some programming experience in C or C++—make the book suitable for self-study or for use as an advanced undergraduate or introductory graduate text. The author gives a thorough treatment of transformations and viewing, lighting and shading, models, interpolation and averaging Bézier curves and B-splines, ray tracing and radiosity, and intersection testing with rays. Additional topics covered in less depth include texture mapping and colour theory. The book covers some aspects of animation, including quaternions, orientation, and inverse kinematics, and includes source code for a Ray Tracing software package. The book is intended for use along with any OpenGL programming book, but the crucial features of OpenGL are briefly covered to help readers get up to speed. Accompanying software is available freely from the book's web site.
