Return To Reality:

The Human Runtime Erik Michálek ,2026-03-27 The Human Runtime is a mechanical map of how human life is built It shows how change becomes signal how signal becomes meaning how meaning binds identity and how identity shapes action reality and trajectory This is not a self help book not spirituality and not ordinary psychology It is a runtime architecture of human functioning The book explains change difference and signal meaning formation and identity binding prediction pressure takeover and lock action reinforcement and reality construction gap return and trajectory repair Hidden Self and Origin Field Genesis Code as recurring runtime architecture language as executable structure contact collective reality and civilizational runtime future intelligence and why intelligence without interruption return and reference becomes dangerous The Human Runtime argues that human beings do not live only in events thoughts or emotions They live inside a recursive architecture through which signal becomes self self becomes action and action becomes lived reality Once this mechanism is seen perception changes permanently

Values of Our Times Deshun Li,2013-06-01 Philosophers have gradually accepted axiology as one branch of philosophy As a basic category belonging to axiology and philosophy value is the general abstraction of concrete value formation in various fields including utility ethics and appreciation of the beauty The problem of value is essentially a problem of historical activities of practice in human society The axiology based on the scientific practice view insists on the principle of unification between theory and practice truth and value In research of axiology the relation between subjectivity and objectivity of values is a problem that must be solved in the first place The modern conversation of value philosophy is the academic and practical demands of the value philosophy research in China Value evaluation is an important part of the axiology In order to deepen the research of value philosophy and to promote the development of current value philosophy we must have scientific mode of thinking suitable for the nature of value It is the base of value relation the origin of value needs the process of value creation and actualization and the fundamental way to proving ones value as a human being

Temporariness has become an increasingly salient feature in international migration that presents itself as fragmented non linear including different intermediate stops and multiple returns and new departures This book proposes a new analytical framework that brings together the role of policies defining migrants as temporary and the role of migrant s own agency in perceiving their migration project as temporary or permanent The proposed analytical framework is conceived taking into account both low skill and high skilled legal and irregular migratory flows and also different visa and citizenship regimes The aim of this book is to highlight the interplay between the lived reality and the policy and legal concepts on temporary migration and point out to the tensions and contradictions inherent in the latter

Contributions to this book cover different country cases including Canada Australia Nepal Taiwan and Germany Italy Russia and several former Soviet Republics as well as a variety of sectors ranging from opera singers to construction and domestic workers This book will be a key resource for academics researchers and advanced students of sociology politics law migration studies and ethnic and racial studies It was originally published as a special issue of the Journal of Ethnic and Migration Studies
