methods of syntactic analysis in tradition ridden Lithuanian grammar The present work addresses an important problem whether the Lithuanian and English constructions under investigation express a subject predicate relationship and form a constituent and can be described as having the syntactic function of a clause For this purpose the syntactic and semantic as well as clausal properties of the sequences NP1 NP2 and NP1 AP in the two languages under consideration are discussed The clausal properties of the sub strings NP1 NP2 and NP1 AP are investigated on the basis of the presence of agreement features sentence negation the resemblance to full clauses theta role assignment word order and applying sentence constituency tests *Reference interviews, questions, and materials* Thomas P.
