Raven Orphans Series 4:

Sisterhood, Science and Surveillance in Orphan Black Janet Brennan Croft, Alyson R. Buckman, 2019-10-30 The BBC America series Orphan Black 2013-2017 won acclaim for its compelling writing, resonant themes, and innovative special effects. And for the bravura acting of Tatiana Maslany who plays an ever-growing number of clones drawn into an increasingly dangerous world of cutting-edge science, corporate espionage, military secrets, and religious fanaticism. Her pioneering shows centered on strong female characters such as Buffy the Vampire Slayer, Dollhouse, Lost, and Xena Warrior Princess. Orphan Black models the current Golden Age of serial form storytelling with themes of identity, bodily autonomy, gender, and sexuality playing against corporate greed and its co-opting of science. This collection of new essays analyzes the diverse clone characters and the series covering topics including motherhood, surveillance, culture, mythology, eugenics, and special effects, as well as the science behind cloning.

Assessment of Intellectual Functioning Lewis R. Aiken, 2004-05-31 This fully updated comprehensive text examines the assessment of intellectual abilities in children and adults. Chapters emphasize the rationale and techniques for measuring intellectual function in educational, clinical, and other organizational settings. The author includes detailed descriptions of the most widely used procedures for administering scoring and interpreting individual and group intelligence tests. This second edition features additional material on testing the handicapped individual and group differences in mental abilities, theories and issues in the assessment of mental abilities, and new tests for measuring intelligence and related abilities.
