## **Re Engineering Female Friendly Science:**

**Re-engineering Female Friendly Science** Sue Vilhauer Rosser, 1997 Sue Rosser's pioneering 1990 work *Female Friendly Science* introduced feminist teaching methods to maths and science education and gave us a six stage model for transforming curricula to attract and retain women in science engineering and mathematics programmes So successful was this new pedagogical paradigm that its reforms were assimilated into mainstream science education but ironically sacrificed their appeal to women in the process Now in this study Rosser revisits the feminist origins of curriculum transformation and puts the gender back in gender equity

[Understanding Girls](#) Dale Rose Baker, 2016-07-25 *Understanding Girls* Quantitative and Qualitative Research is a retrospective of the author's research that led to receiving the 2013 Distinguished Contributions Award to Science Education through Research This book includes selected articles that document changes in her research approaches and theoretical frameworks The articles represent the evolution of her thinking about the issue of girls in science as well as her impact on science education The author's work is placed in the context of science education research at the time of publication research in education and psychology and the culture of the times She pulls back the curtain that often makes the messy work of research seem straightforward and linear to reveal why she did the research and the methodological decisions she faced She describes the serendipitous nature of some of the work as well as her frustrations in trying to understand data and struggles to insure that she accurately and respectfully presented the voices of girls and their teachers The book also includes some of the earliest research in engineering education preceding the focus on engineering practices found in the Next Generation Science and Engineering Standards *Understanding Girls* provides insights into why girls may or may not decide to participate in science and engineering and what can be done to increase their participation It provides evidence that we have increased girls participation and the challenges that remain to insure that every girl who wants to become a scientist or engineer has the opportunity to do so

**Women in Science and Engineering** Cecily Cannan Selby, 1999 This volume comprises papers that assess whether where and how progress has taken place in the 25 years since the Academy held a conference entitled *Women in Science Determinants of Success* and recommend ways of accelerating it on the basis of research and the best practices to be found in corporate government and academic institutions The participants and

presenters come from large and small industries colleges and universities and government agencies they also represent a cross section of the scientific world ranging from student to Nobel laureate The shared perspective of the conference was that increased diversity must be aided and abetted through substantive changes in the attitudes policies and practices that inform how we educate and evaluate the workforce and how we manage the workplace [The Science Glass Ceiling](#) Sue V. Rosser,2004-05-29 In this timely and invaluable study Sue Rosser chronicles the plight of women faculty across the USA noting the difficulties double standards and backlash that they routinely face [Resources in Education](#) ,1998 **Journal of Women and Minorities in Science and Engineering** ,2003 *Gender Gaps* ,1998 *Gender Gaps Where Schools Still Fail Our Children* directly addresses the conflict between the standards movement and the pursuit to educational equity the most hotly debated topic in schools today and of concern to all parents of school aged children On the eve of the 21st century what progress have we made What gaps still need to be addressed How are technological advances and profound shifts in school demographics changing the way we teach Most importantly do new approaches to teaching and learning benefits both girls and boys *Gender Gaps* confirms that public schools are making progress toward equitable treatment of boys and girls Nevertheless high academic standards for all students cannot be realized without equity Equity differs from equality in asking not whether girls and boys receive the same education but whether they receive the right education to achieve a shared standard of excellence **Journal of Engineering Education** ,2007 [Handbook of Feminist Research](#) Sharlene Nagy Hesse-Biber,2007 The topic feminist research has too often been neglected in standard research methods books The *Handbook of Feminist Research* represents the establishment of a new tradition or paradigm in viewing how the research process is implemented Feminist researchers bring unique epistemological and methodological perspectives to the research process Feminists approach to methodology allows for new types of questions about women s lives and those of other ed marginalized groups to be addressed within their respective fields of research This *Handbook* stresses the interconnections between epistemology methodology and methods They are not de linked from each other but work together in dynamic ways to produce new knowledge and this openness itself is also characteristic of how feminist researchers approach their work Feminists engage synergistically with all three aspects of the research process epistemology methodology and method Through a synergistic connection between these elements of research epistemology methodology and method we find that feminist research often shapes new research endeavors that are greater than the sum of their parts In other words while traditional research employs these components of research the synergistic engagement of these components in feminist research questions the status quo aiming to raise our consciousness about how we do research Looking at the selections provided in this *Handbook* we are able to look at feminist research its implementation of synergistic use of epistemology methodology and method and the resulting qualities of feminist research in practice [Public Understanding of Science](#) ,2004 An international journal of research in the public dimensions of science and technology [NWSA Journal](#) ,2005

*Health Sue V. Rosser, 1997* This essay examines the ways in which health as a discipline has been influenced by feminist scholarship in the field It explains that feminist scientists in the field have recognized and sought to address gender bias in traditional approaches to health research including the androcentric bias in defining priorities for medical research the lack of funding for clinical research on women failure to recognize the effects of gender and interactions between gender ethnicity and class in research There is growing evidence to support the assertion that access to health care differs in accordance with gender race class and age and excessive focus on male research subjects and the definition of some diseases as male diseases has led to the underdiagnosis and undertreatment of these diseases in older women It also notes that the exclusion of women of color and lesbians and their health care needs from clinical research has often resulted in inadequate or inappropriate theories and conclusions being drawn from the data Contains 110 references MDM *Feminist Periodicals*, 1999 **Feminist Studies**, 1998 Northwest Anthropological Research Notes, 1999 **Book Review Index**, 2000 Every 3rd issue is a quarterly cumulation *Teaching Children Science* Joseph Abruscato, 2001 This truncated paperback volume is composed of strategies and techniques for teaching science derived from the fifth edition of Joseph Abruscato's successful text *Teaching Children Science A Discovery Approach* The first nine chapters of *Teaching Children Science* are included in this new title to provide students with a discovery approach to promote the teaching of the concepts skills and attitudes of science in the classroom These nine basic science teaching methods chapters cover strategies and techniques for teachers to incorporate cooperative learning questioning and active listening in their classrooms The author also covers planning and managing discovery based units assessing students learning and understanding the preparation of Internet based Science WebQuests and integrating science across the curriculum Handbook of Gender in Archaeology Sarah M.
