and how they affect reading This book is mainly about legibility and comprehension language is mostly seen as a medium Birth of the Cluster text This book introduces the cluster text style to a wide audience Reading speed can be measured in different ways words per minute wpm day span two day span and week span This two part book should be extensive enough so that average readers 200 wpm could test their week span and advanced readers 500 wpm their two day span i e this reading experience should bring clarity to which typographic style is better to read Hence this book could be seen as a scientific experiment Cluster texts could be as much as twenty percent better than ordinary texts If this test will show that we should change how we write texts In other words this could be a revolutionary reading experience you could falsify your earlier thoughts on texts and reading Introduction to the Art of Learning This book introduces an art of reading in an art of learning To be able to learn how to read better content is needed In this book you will learn about philosophy science and pedagogy It is about what philosophy science and how pedagogy we learn Hence this book can also be seen as a general introduction to those areas Note that this book is part one of a two part book Note also that the cluster text style is not reflowable and that you need a screen where you can read a line length of 95 characters i e narrow screens are inappropriate
