Simproject W Access Code Cd:

SimProject Player's Manual and Access Code Jeffrey K. Pinto, Diane H. Parente, 2003 With the rapid rise of computers and advanced technology in the classroom have come new pedagogical approaches to teaching One of the most powerful of these approaches is the use of computer simulations to demonstrate real world business practices the inter relatedness of various business functions and the role of competitive decision making in business Computer simulations encourage team development collaboration global thinking and a predilection to consider the ramifications of decisions and their effect on the bottom line in other words many of the skills that are useful to project managers and team members in business The purpose of this simulation is to tie together many of the salient challenges of project management in order to give students the deepest possible understanding of the complexities involved in undertaking a project The goal of the simulation will be to have students manage a project from initiation to completion Within this framework the student will need to employ and develop skills pertinent to personnel selection and training motivation conflict management and stakeholder management Students will be required to use planning and scheduling techniques such as work breakdown structures PERT CPM scope development and risk analysis The topical coverage will have approximate coincidence with the Project Management Institute's Body of Knowledge PMBOK insuring that the students gain exposure to those topics recognized by the key professional organization for project manager Although perfectly useful as a stand alone piece of software this simulation can be bundled with either of any project management books discounting both bundled items An especially attractive option is to bundle it with the Second Edition of Project Management The Managerial Process by Gray and Larson Great pains were taken to coordinate the revision of this book with the development of Pinto and Parente's simulation One of the four scenarios used in the simulation has been cast in the form of a continuing case used in the book thus making a tie in between the book and the simulation
