

MAKING THINKING VISIBLE

~ A GOAL AND SET OF PRACTICES ~

Documentation

- What processes and steps are important to capture?
- What do we want to document so we can refer back?
- Where, when, and how might we use documentation to lessen the cognitive load?
- What parts of the routine are self-documenting?

How am I capturing and feeding back the learning & thinking emerging from my listening?

Which questions are driving the learning? How do the questions help tell the story of our learning?

Thinking Routines

What am I wanting students to understand?

What kinds of thinking are needed to engage with & make sense of this content?

Which routines might best support & scaffold students' thinking?

Listening

- What will I listen for?
- What am I curious to understand about students' process & thinking?
- What specific parts of the routine provide occasions for listening?
- Where will I need to stay silent so you can listen for the learning?

Questioning

- Where can I ask follow up questions, such as WMVST?, that require students to elaborate & explain?
- What key questions are embedded in the routine?
- What student-generated questions are emerging from our learning?

How am I showing students I am curious & interested in their responses to my questions and not just looking for a correctness?

The Thinking Machine Charles Judson Herrick,1929 This is a book about the natural history of human nature It is not a book about philosophy for philosophers It is a plain and straightforward statement for ordinary people of what another very ordinary sort of man who has considerable experience with the mechanisms of human life and how they work thinks about it all We all want to understand human nature better because it is our nature The better we understand it the more likely we are to get along with ourselves our neighbors and our surroundings in general We want to make life more worth while to get as much out of it as we can and to put as much into it as we can to make a better living and to have as much fun doing it as possible We need to know how we live what the apparatus of life is and how it works in order to make a better job of it Preface
