Knowledge and Interaction Andrea A. diSessa, Mariana Levin, Nathaniel J.S. Brown, 2015-12-07 Decades of research in the cognitive and learning sciences have led to a growing recognition of the incredibly multi faceted nature of human knowing and learning Up to now this multifaceted nature has been visible mostly in distinct and often competing communities of researchers From a purely scientific perspective siloed science where different traditions refuse to speak with one another or merely ignore one another is unacceptable This ambitious volume attempts to kick start a serious new line of work that merges or properly articulates different traditions with their divergent historical theoretical and methodological commitments that nonetheless both focus on the highly detailed analysis of processes of knowing and learning as they unfold in interactional contexts in real time Knowledge and Interaction puts two traditions in dialogue with one another Knowledge Analysis KA which draws on intellectual roots in developmental psychology and cognitive modeling and focuses on the nature and form of individual knowledge systems and Interaction Analysis IA which has been prominent in approaches that seek to understand and explain learning as a sequence of real time moves by individuals as they interact with interlocutors learning environments and the world around them The volume s four part organization opens up space for both substantive contributions on areas of conceptual and empirical work as well as opportunities for reflection integration and coordination
