

Information Processing Approach

Define cognition and differentiate among the stage, levels-of-processing, parallel distributed processing, and connectionist models of information processing...

Mass Media And Political Thought An Information Processing Approach

Holli A Semetko, Margaret Scammell

Mass Media And Political Thought An Information Processing Approach:

Mass Media and Political Thought Sidney Kraus, Richard M. Perloff, 1985-11 Mass Media and Political Thought is a state of the art collection of original research on the cognitive psychology of political communication Political information processing is examined in several stages 1 voters ability to process political information 2 voters motivation to process such information 3 the effects of political messages and 4 the impact of these processes and effects on the polity **Mass Media and Political Thought** Sidney Kraus, Richard M. Perloff, This collection of original state of the art research on the cognitive psychology of political communication addresses the central question of how individuals process political information Using a model developed by the editors political information processing is examined in several stages 1 voters ability to process political information 2 voters motivation to process such information 3 the effects of political messages and 4 the impact of these processes and effects on the polity The contributors approaches to the investigation of information processing represent a broad spectrum of methodologies and disciplinary perspectives ranging from the macrosociological to microcognitive to affective All reflect the central beliefs that voters play an active role in the construction of political reality and that cognitive processes do help explain why communication has certain types of effects and why they minimize media influence **The Routledge Handbook of Emotions and Mass Media** Katrin Döveling, Katrin Döveling, Christian von Scheve, Elly A. Konijn, 2010-10-04 The impact of mass media on individuals and society is to a great extent based on human emotions Emotions in turn are essential in understanding how media messages are processed as well as media s impact on individual and social behavior and public social life Adopting an interdisciplinary approach to the study of emotions within a mass media context the Handbook of Emotions and Mass Media addresses areas such as evolutionary psychology media entertainment sociology cultural studies media psychology political communication persuasion and new technology Leading experts from across the globe explore cutting edge research on issues including the evolutionary functions of mediated emotions emotions and media entertainment measurements of emotions within the context of mass media media violence fear evoking media politics and public emotions features forms and functions of emotions beyond the message and provide the reader a glimpse into future generations of media technology This compelling and authoritative Handbook is an essential reference tool for scholars and students of media communication studies media psychology emotions cultural studies sociology and other related disciplines **Television and Political Advertising** Frank Biocca, 2013-12-16 This volume represents one of the first major scholarly effort to unravel the psychological and symbolic processing of political advertising Utilizing survey experimental qualitative and semiotic methodologies to study this phenomenon the contributors to Television and Political Advertising trace how political ads help to interpret the psychological reality of the presidential campaign in the minds of millions of voters A product of the National Political Advertising Research Project this interdisciplinary effort is valuable to researchers in advertising communication and consumer psychology since it helps define future work on the

relationship between television politics and the mind of the voter This volume *Television and Political Advertising Psychological Processes* is the first of two and covers such topics as Models and Theories for Viewing Political Television Psychological Processing of Issues Images and Form Differential Processing of Positive and Negative Advertising and The Psychological Contexts of Processing The SAGE Handbook of Political Communication Holli A Semetko, Margaret Scammell, 2012-07-15 This authoritative and comprehensive survey of political communication draws together a team of the world's leading scholars to provide a state of the art review that sets the agenda for future study It is divided into five sections Part One explores the macro level influences on political communication such as the media industry new media technology and political systems Part Two takes a grassroots perspective of the influences of social networks real and online on political communication Part Three discusses methodological advances in political communication research Part Four focuses on power and how it is conceptualized in political communication Part Five provides an international regional and comparative understanding of political communication in its various contexts The SAGE Handbook of Political Communication is an essential benchmark publication for advanced students researchers and practitioners in the fields of politics media and communication sociology and research methods Praeger Handbook of Political Campaigning in the United States William L. Benoit, 2016-02-22 This work peels back the curtain on how political campaigns influence America covering everything from social media to getting to the Oval Office This comprehensive handbook reveals essentially everything the American public wants to know about political campaigns The two volume set begins with a historical overview then goes on to investigate campaigns from a variety of perspectives that shed light on how they work and why Readers will discover how campaigns are run how they're covered by the media how they influence government and how various interest groups and demographics play a part in the system The contributors who include academics elected officials journalists and campaign professionals offer new data interviews and analysis in a style that will prove fresh accessible and engaging for everyone from college students to political junkies They offer the inside scoop on types of campaign media for example TV spots debates and social media and on message variables such as language humor and evidence Groups of voters like women and youth are examined and the work also discusses theories of campaigning such as agenda setting issue ownership the Elaboration Likelihood Model and the Theory of Reasoned Action Scandal in American political campaigns always a subject of interest is addressed as well **Mass Communication and Political Information Processing** Sidney Kraus, 1990 Media Effects Jennings Bryant, Dolf Zillmann, Mary Beth Oliver, 2002-02-01 This new edition updates and expands the scholarship of the 1st edition examining media effects in Democracy without Citizens Robert M. Entman, 1990-09-27 The free press cannot be free Robert Entman asserts Inevitably it is dependent In this penetrating critique of American journalism and the political process Entman identifies a vicious circle of interdependence as the key dilemma facing reporters and editors To become sophisticated citizens he argues Americans need high quality independent

political journalism yet to stay in business while producing such journalism news organizations would need an audience of sophisticated citizens As Entman shows there is no easy way out of this dilemma which has encouraged the decay of democratic citizenship as well as the media's continuing failure to live up to their own highest ideals Addressing widespread despair over the degeneration of presidential campaigns Entman argues that the media system virtually compels politicians to practice demagoguery Entman confronts a provocative array of issues how the media's reliance on elite groups and individuals for information inevitably slants the news despite adherence to objectivity standards why the media hold government accountable for its worst errors such as scandals and foreign misadventures only after it's too late to prevent them how the interdependence of the media and their audience molds public opinion in ways neither group alone can control why greater media competition does not necessarily mean better journalism why the abolition of the FCC's Fairness Doctrine could make things worse Entman sheds fascinating light on important news events of the past decade He compares for example coverage of the failed hostage rescue in 1980 which subjected President Carter to a barrage of criticism with coverage of the 1983 bombing that killed 241 Marines in Lebanon an incident in which President Reagan largely escaped blame He shows how various factors unrelated to the reality of the events themselves the apparent popularity of Reagan and unpopularity of Carter differences in the way the Presidents publicly framed the incidents the potent symbols skillfully manipulated by Reagan's but not by Carter's news managers produced two very different kinds of reportage Entman concludes with some thoughtful suggestions for improvement Chiefly he proposes the creation of subsidized party based news outlets as a way of promoting new modes of news gathering and analysis of spurring the established media to more innovative coverage and of increasing political awareness and participation Such suggestions along with the author's probing media criticisms make this book essential reading for anyone concerned about the state of democracy in America **The**
