Practical Mathematics for Everyday Living K M Becker, 2023-05-13 Looking for simplified math with step by step instructions and examples Then this is for you Remember when math was fairly simple When we were all taught the same methods that our parents and grandparents were taught and could understand each other When it was easy to grab a pen and paper and get the answers Heck even being able to balance a checkbook without a calculator Yes I said checkbook LOL This is a simplified compilation of basic math and how to do it Something that seems to be lacking in today's world where answers are googled instead of problems solved From addition and subtraction to multiplication and division I cover the basics and throw in how to count money find the best sales deals figure sales tax and even figure out wages as well If you're wondering just how needed this is ask five random people to figure out what 60% off of something is or ask the average teen how many hours they'd need to work to pay for their car insurance or phone bill *Maths is all Around You* Marianne Knaus, 2015-04-23 We encounter mathematics on a regular basis in one form or another For some people maths is scary and not something they feel confident about Even though many educators and parents attempt to provide good mathematics experiences there is still a high level of anxiety about the teaching and learning of mathematics This book presents a broad range of concepts and aims to widen the narrow view that maths for young children is just about numbers and shapes The content includes pattern early algebra counting number early operations measurement shape and spatial awareness geometry matching sorting data analysis and the introduction of chance statistics and probability This book is intended for educators and parents who would like to explore and investigate maths concepts to enrich children's experiences and extend their current thinking and learning **The Life-Changing Magic of Numbers** Bobby Seagull, 2018-10-25 If you found maths lessons at school irrelevant and boring that's because you didn't have a teacher like Bobby Seagull As seen on Monkman Seagull's Genius Guide to Britain Long before his rise to cult fandom on University Challenge Bobby Seagull was obsessed with numbers They were the keys that unlocked the randomness of football results the beauty of art and the best way to get things done In his absorbing book Bobby tells the story of his life through numbers and shows the incredible ways maths can make sense of the world around us From magic shows to rap lyrics from hobbies to outer space from fitness to food Bobby's infectious enthusiasm for numbers will change how you think about almost everything Told through fascinating stories and insights from Bobby's life and with head scratching puzzles in every chapter you'll never look at numbers the
