Centuries of Silence Leonardo Ferreira,2006-10-30 The history of Latin American journalism is ultimately the story of a people who have been silenced over the centuries primarily Native Americans women peasants and the urban poor This book seeks to correct the record propounded by most English language surveys of Latin American journalism which tend to neglect pre Columbian forms of reporting the ways in which technology has been used as a tool of colonization and the Latin American conceptual foundations of a free press Challenging the conventional notion of a free marketplace of ideas in a region plagued with serious problems of poverty violence propaganda political intolerance poor ethics journalism education deficiencies and media concentration in the hands of an elite Ferreira debunks the myth of a free press in Latin America The diffusion of colonial presses in the New World resulted in the imposition of a structural censorship with elements that remain to this day They include ethnic and gender discrimination technological elitism state and religious authoritarianism and ideological controls Impoverished afraid of crime and violence and without access to an effective democracy ordinary Latin Americans still live silenced by ruling actors that include a dominant and concentrated media Thus not only is the press not free in Latin America but it is also itself an instrument of oppression

New Scientist ,2009

A Companion to Linear B Yves Duhoux,Anna Morpurgo Davies,2007

Multilingualism, Lingua Franca and Lingua Sacra Jens E. Braarvig,Markham J. Geller,2018 The present book comprises a number of studies centered around the topic of how knowledge diffuses from one culture to another and how knowledge diffusion is connected with the spread of languages and the conceptual systems they carry by translation This diffusion also takes place also over linguistic borders in the way that a given receiving language may also absorb systems of knowledge from languages that are linguistically quite unrelated but culturally connected with respect to knowledge transfer Thus we find that Sumerian concepts with considerable impact were moved into the Akkadian language along with writing systems religion science and literature even though linguistically the languages are completely unrelated Another example is how Chinese culture and writing systems spread throughout East Asia into Korea Japan and Vietnam though the languages of these countries were linguistically unrelated to Chinese The same case can be made for Buddhist ways of thinking when it was clothed in the garb of Chinese or Tibetan or one of the other languages along the Silk Road This is also true for the spread of Manicheism as it was portrayed in a great number of languages related or unrelated German and Latin are

linguistically related but when Latin learning was communicated in Old High German many of its terms were created in Middle German to accommodate the Latin conceptual world and the German language was lastingly enriched with novisms denoting concepts of the Classical traditions of learning in a process parallel to the spread of Greek Christianity into the East European cultures and languages The book describes some cases of such knowledge transfer and what kind of mechanisms are involved in the ensuing language changes in the receiving languages and cultures **The Literary Review** ,2009
