Hong, 2019-12-16 This book provides analyses and evaluations of the Health Profession Opportunity Grants HPOG program a federal government demonstration project that is targeted at providing career opportunities in the health care field for individuals in low wage populations Learning for Careers Nancy Hoffman, Robert B. Schwartz, 2020-01-15 Learning for Careers provides a comprehensive account of the Pathways to Prosperity Network a national initiative focused on helping more young people successfully complete high school attain a first postsecondary credential with value in the labor market and get started on a career without foreclosing the opportunity for further education It takes as its starting point the influential 2011 Pathways to Prosperity report which challenged the prevailing idea that the core mission of high schools was to prepare all students for college In response the Pathways Network was founded in 2012 to promote cooperative arrangements between educational and business institutions in order to fashion pathways for young people to acquire twenty first century skills and achieve professional success This book traces the evolution of the Pathways Network over the past five years focusing on the efforts of a diverse set of states and regions to build systems that span high school and the first two years of postsecondary education States such as Delaware and Tennessee have been highly effective in establishing systems designed to equip students with credentials valued in the contemporary labor market At the same time the authors acknowledge the technical political and cultural challenges in redesigning career focused education to produce satisfactory outcomes for young people throughout the country Learning for Careers offers a way forward for the millions of young people and employers that face a rapidly evolving and ever more competitive globalized workplace This book will be essential reading for all who have a stake in educational and economic opportunity in the United States *New Pathways to Careers and College* Mary G. Visher, David Stern, 2015 The debate about high school reform is increasingly focused on the role of career technical education CTE in helping to prepare all students for success in both postsecondary education and the workforce The stand alone vocational courses into which high school students with lower academic achievement were often channeled are becoming a thing of the past Instead programs that merge CTE rigorous academic coursework and career exploration opportunities while creating clear pathways through high school college and beyond are gaining momentum This report describes some of the most prominent of these pathway models identifies localities where the approach has gained the most traction discusses the underlying principles that characterize the most promising programs and briefly presents the evidence of their potential to make a difference The report concludes with a set of recommendations for future investment to strengthen and scale such programs The following

Rosenbaum, Caitlin E. Ahearn, Janet E. Rosenbaum, Janet Rosenbaum, 2017-09-02 College for all has become the new American dream Most high school students today express a desire to attend college and 90% of on time high school

graduates enroll in higher education in the eight years following high school Yet degree completion rates remain low for non traditional students students who are older low income or have poor academic achievement even at community colleges that endeavor to serve them What can colleges do to reduce dropouts In *Bridging the Gaps* education scholars James Rosenbaum Caitlin Ahearn and Janet Rosenbaum argue that when institutions focus only on bachelor s degrees and traditional college procedures they ignore other pathways to educational and career success Using multiple longitudinal studies the authors evaluate the shortcomings and successes of community colleges and investigate how these institutions can promote alternatives to BAs and traditional college procedures to increase graduation rates and improve job payoffs The authors find that sub baccalaureate credentials associate degrees and college certificates can improve employment outcomes Young adults who complete these credentials have higher employment rates earnings autonomy career opportunities and job satisfaction than those who enroll but do not complete credentials Sub BA credentials can be completed at community college in less time than bachelor s degrees making them an affordable option for many low income students *Bridging the Gaps* shows that when community colleges overemphasize bachelor s degrees they tend to funnel resources into remedial programs and try to get low performing students on track for a BA Yet remedial programs have inconsistent success rates and can create unrealistic expectations leading struggling students to drop out before completing any degree The authors show that colleges can devise procedures that reduce remedial placements and help students discover unseen abilities attain valued credentials get good jobs and progress on degree ladders to higher credentials To turn college for all into a reality community college students must be aware of their multiple credential and career options *Bridging the Gaps* shows how colleges can create new pathways for non traditional students to achieve success in their schooling and careers

Higher Education, Place, and Career Development Rosie Alexander, 2024-11-21 Drawing connections between the findings of a research project following young graduates from the Scottish islands of Orkney and Shetland current international evidence and theoretical literature this book argues that understanding rural and island student transitions can expose the wider dynamics of place and mobility at play during student and early career experiences Highlighting the importance of a career perspective Rosie Alexander encourages readers to consider how career pathways develop across time and across transition points unsettling the notion of a straightforward transition through university into the workplace The book uncovers how student trajectories are developed through interweaving dynamics of relationships place and career routes and unpacks the implications for policymakers and practitioners It contends that a much greater spatial awareness is necessary to understand and support the educational and career pathways of higher education students This is a crucial read for higher education researchers policymakers and students interested in rurality as well as access to and transition from higher education

Career Pathways Handbook Jim Cassio, 2004 Most of the content in the Career Pathways Handbook is based on a series of career profiles each one packed with four pages of valuable information including the latest U S employment statistics and wage information career dialogues with real people who work in the occupations and extensive information for identifying and comparing related occupations Each profile uses a consistent format to allow for easy reading and useful comparisons between occupations While this book is based on a foundation of 154 different occupations it also includes valuable information on several hundred occupations via the career path and related occupations tables It is important to me that the information in this book will not only be useful to readers but also be as current and reliable as possible Therefore I have included the most recent information from reliable Government sources as well as my own proprietary information from 20 years of extensive occupational research The Government sources are U S Department of Labor DOL programs For example I have incorporated information from DOL s new O NET Database which includes the occupation titles and definitions common job tasks key skills and abilities and related occupations I have added the most recent employment statistics and wage information from DOL s Bureau of Labor Statistics Finally from our own research I have added career path and real people career dialogue elements and have enhanced and expanded the DOL information

throughout For example the O NET Related Occupations lists were significantly expanded and education training information along with growth and wage data were added to make occupational comparisons more meaningful The Job Tasks have been expanded to make them more useful The education and training information is based on DOL s Typical Education Levels but has also been expanded for this book I have also written or rewritten many of the job outlook and analysis statements that are incorporated into the Employment Outlook sections Finally I have included a number of resource guides to help job seekers and career explorers reach their goals Beginning on page 617 there are guides on Planning Your Career Researching Occupations Education Training Options Looking for a Job Competing for a Job Writing a Resume Writing a Cover Letter Completing the Application Preparing for the Interview and Common Interview Questions There are countless numbers of books both good and bad ones on all of these subjects so I ve included a list of my favorite books on my website under Readers Resources see www.cassio.com Also included on this website is an online guide to State Training Postsecondary Education Directories and a list of my Favorite Job Websites Best regards Jim Cassio www.cassio.com An absolutely essential career reference for finding comprehensive job information spanning a total of 150 occupations This is the all inclusive guide to helping a job seeker go from planning a career to looking for a job The career profiles offer extensive statistical research on employment and job skills for each career path Highly recommended for all public and academic libraries Regina Jimenez Research Librarian Folsom Lake College This book is a wonderful and powerful tool for guidance counselors and individuals who are looking to start change or enhance their careers The Career Pathways Handbook provides useful and insightful job skills information in a clear and reasoned manner The personal point of view provided by the career professionals in each career gives the user an inside perspective on making career decisions that is refreshing David Owens Retired Research Manager California Employment Development Department p
