*Inventing Benjy* Frédérique Spill, 2024-01-30 *Inventing Benjy* William Faulkner's Most Splendid Creative Leap is a groundbreaking work at the intersection of Faulkner studies and disability studies Originally published in 2009 by Presses de la Sorbonne Nouvelle as *L'Idiotie dans l'œuvre de Faulkner* this translation brings the book to English language readers for the first time Author Frédérique Spill begins with a sustained look at the monologue of Benjy Compson the initial first person narrator in Faulkner's *The Sound and the Fury* Spill questions the reasons for this narrative choice bringing readers to consider Benjy's monologue which is told by a narrator who is deaf and cognitively disabled as an impossible discourse This paradoxical discourse which relies mostly on senses and sensory perception sets the foundation of a sophisticated poetics of idiocy Using this form of writing Faulkner shaped perspective from a disabled character revealing a certain depth to characters that were previously only portrayed on a shallow level This style encompasses some of the most striking forms and figures of his leap into modernist writing In that respect *Inventing Benjy* thoroughly examines Benjy's discourse as an experimental workshop in which objects and words are exclusively modelled by the senses This study regards Faulkner's decision to place a disabled character at the center of perception as the inaugural and emblematic gesture of his writing Closely examining excerpts from Faulkner's novels and a few short stories Spill emphasizes how the corporal temporal sensorial and narrative figures of idiocy are reflected throughout Faulkner's work These writing choices underlie some of his most compelling inventions and certainly contribute to his unmistakable writing style In the process Faulkner's writing takes on a phenomenological dimension simultaneously dismantling and reinventing the intertwined dynamics of perception and language

**What Is Health?** Peter Sterling, 2020-02-18 An argument that health is optimal responsiveness and is often best treated at the system level Medical education centers on the venerable no-fault concept of homeostasis whereby local mechanisms impose constancy by correcting errors and the brain serves mainly for emergencies Yet it turns out that most parameters are not constant moreover despite the importance of local mechanisms the brain is definitely in charge In this book the eminent neuroscientist Peter Sterling describes a broader concept allostasis coined by Sterling and

Joseph Eyer in the 1980s whereby the brain anticipates needs and efficiently mobilizes supplies to prevent errors. Allostasis evolved early. Sterling explains to optimize energy efficiency relying heavily on brain circuits that deliver a brief reward for each positive surprise. Modern life so reduces the opportunities for surprise that we are driven to seek it in consumption: bigger burgers, more opioids, and innumerable activities that involve higher carbon emissions. The consequences include addiction, obesity, type 2 diabetes, and climate change. Sterling concludes that solutions must go beyond the merely technical to restore possibilities for daily small rewards and revivify the capacities for egalitarianism that were hard-wired into our nature. Sterling explains that allostasis offers what is not found in any medical textbook: principled definitions of health and disease. Health is the capacity for adaptive variation, and disease is shrinkage of that capacity. Sterling argues that since health is optimal responsiveness, many significant conditions are best treated at the system level.

*Ecology of the Body* Joseph Lyons, 1987. *Ecology of the Body* presents an argument for describing our behavior in accordance with the ways we experience our bodies. Increasingly, psychologists are recognizing that human beings show great diversity in the ways they perform the vast repertoire of human behaviors such as perceiving, reasoning, remembering, forgetting, that we may well possess not simply different levels of intelligence but also different forms of it in varying combinations, just as we show differing degrees of emotion, goal-directed activity, and creativity. Lyons puts forward a hypothesis in which he argues for the utility of understanding these differences as stylistic variations that are inseparable from our physical experience of ourselves.
