

# THE IMPORTANCE OF NITRIC OXIDE (NO)

"Most if not all chronic diseases, including cardiovascular disease are characterized and caused by the loss of nitric oxide production."

Dr. Nathan S. Bryan

Loss of **NO** is associated with Atherosclerosis

As we age, we lose 85% of our ability to make Nitric Oxide

Nitric oxide is best known for its importance in blood vessel health (including blood pressure, erectile function, and protection against heart attack and stroke). With improved blood flow comes better nutrient and oxygen delivery. Everything works better with enhanced nutrient delivery and waste product removal.
