Nitric Oxide In Plants Occurrence And Function:

Annual Plant Reviews, Nitrogen Metabolism in Plants in the Post-genomic Era Christine Foyer, Hanma Zhang, 2011-06-09 The field of plant nitrogen metabolism continues to be a compelling focus for basic research activities because there is a strong demand for immediate solutions particularly in key areas such as improving plant nitrogen use efficiency which are crucial to future agricultural sustainability and the future economic success of agriculture The 13 reviews which comprise this excellent and carefully edited new volume bring together the expertise and enthusiasm of an international team of leading researchers Topics covered include nitrogen sensing and signalling uptake and membrane systems nitric oxide primary nitrogen assimilation and C N balance and interactions and regulation of root and plant architecture Together these reviews provide an insight into how plants sense uptake and assimilate nitrogen into the organic compounds required for growth co ordinate nitrogen and carbon metabolism and regulate growth and development according to nitrogen availability The transcription factors that act to integrate environmental nutrient nitrogen signals to co ordinate primary and secondary metabolism are discussed together with new concepts of cross talk transport and signalling and how such molecular networks influence nitrogen and carbon cycling processes in the environment Annual Plant Reviews Volume 42 Nitrogen Metabolism in Plants in the Post genomic Era is an essential purchase for advanced students researchers and professionals in plant sciences biochemistry physiology molecular biology genetics and agricultural sciences working in the academic and industrial sectors Libraries in all universities and research establishments where these subjects are studied and taught will need copies of this excellent volume on their shelves **Nitric Oxide in Plants** Y.Y. Leshem, 2012-12-06 This book the first published on this topic in plants presents the reader with an overview of recent research on nitric oxide NO in plants which in view of its empirical interest and its growth regulatory potential is in the forefront of scientific endeavor in plant science Subject matter is divided into two parts Part 1 deals with NO and peroxynitrite biochemistry and regulative mechanisms as presently known in the Plant Kingdom and outlines some of the problems still awaiting clarification Emphasis is placed on ethylene emission regulation postharvest control plant phytopathology and environmental stress tolerance A further topic is plant NO like Viagra related to cyclic nucleotide turnover Part 2 deals with environmental aspects of NO as an atmospheric pollutant and discusses endogenous means which plants at times employ to cope with this particular type of stress and how their coping mechanisms may be harnessed for purposes of depollution and augmentation of nitrogen fertilization The text accompanied by a wealth of illustrations and annotated references is intended for lecturers advanced students and research scientists at universities and research institutes dealing with plant sciences and agriculture as well as for environmental researchers **Peroxisomes and their Key Role in Cellular Signaling and Metabolism** Luis A. del Río, 2013-07-03 Peroxisomes are a class of ubiquitous and dynamic single membrane bounded cell organelles devoid of DNA with an essentially oxidative type of metabolism In recent

years it has become increasingly clear that peroxisomes are involved in a range of important cellular functions in almost all eukaryotic cells. In higher eukaryotes including humans peroxisomes catalyze ether phospholipids biosynthesis fatty acid alpha oxidation glyoxylate detoxification etc and in humans peroxisomes are associated with several important genetic diseases. In plants peroxisomes carry out the fatty acid beta oxidation photorespiration metabolism of ROS RNS and RSS photomorphogenesis biosynthesis of phytohormones senescence and defence against pathogens and herbivores. In recent years it has been postulated a possible contribution of peroxisomes to cellular signaling. In this volume an updated view of the capacity and function of peroxisomes from human animal fungal and plant origin as cell generators of different signal molecules involved in distinct processes of high physiological importance is presented.

Amino Acids in Higher Plants J P F D'Mello, 2015-04-15 Amino acids play a role in the defence mechanisms and stress responses of plants as well as in food quality and safety for humans and animals. Recent advances in the field make a comprehensive overview of the information a necessity. This book collates chapters on plant enzymes and metabolism modulation molecular aspects and secondary products. Also including information on ecology the environment and mammalian nutrition and toxicology it provides an authoritative resource.

Emerging Plant Growth Regulators in Agriculture M. Naeem, Tariq Aftab, 2021-11-13 Emerging Plant Growth Regulators in Agriculture Roles in Stress Tolerance presents current PGR discoveries and advances for agricultural applications providing a comprehensive reference for those seeking to apply these tools for improved plant health and crop yield. As demand for agricultural crops and improved nutritional requirement continue to escalate in response to increasing population plant researchers have focused on identifying scientific approaches to minimize the negative impacts of climate change on agriculture crops. Among the various applied approaches the application of plant growth regulators PGRs have gained significant attention for their ability to enhance stress tolerance mechanisms. This book was developed to provide foundational and emerging information to advance the discovery of novel cost competitive specific and effective PGRs for applications in agriculture. Highlights the latest developments in stress signaling cross talk and PGR mechanisms as applied to agriculture and agronomy. Includes case studies and examples to provide real world insights. Presents resources for future research and field application.

Interplay between NO Signalling, ROS and the Antioxidant System in Plants Jeremy Astier, Gary Loake, Violeta

Velikova, Frank Gaupels, 2017-01-19 Over the last decades nitric oxide NO has emerged as an essential player in redox signalling Reactive oxygen species ROS also act as signals throughout all stages of plant life Because they are potentially harmful for cellular integrity ROS and NO levels must be tightly controlled especially by the classical antioxidant system and additional redox active metabolites and proteins Recent work provided evidence that NO and ROS influence each other s biosynthesis and removal Moreover novel signalling molecules resulting from the chemical reaction between NO ROS and plant metabolites have been highlighted including N2O3 ONOO NO2 S nitrosogluthathione and 8 NO2 cGMP They are involved in diverse plant physiological processes the best characterized being stomata regulation and stress defense Taken together these new data demonstrate the complex interactions between NO ROS signalling and the antioxidant system This Frontiers in Plant Science Research Topic aims to provide an updated and complete overview of this important and rapidly expanding area through original article and detailed reviews
