**NLP** Ted Goleman,2021-04-30 Do you find yourself trapped in things that you cannot untangle yourself from even when you try so hard to beat them Have you opted to using other unorthodox means to deal with some of these problems with little or no success Well what is it that you are trying to fight Is it an addiction that you have found impossible to stop a phobia anxiety low self esteem or any other problem What do you think has been making you fall every time you try overcoming the problem Have you always been beating yourself up and saying that you are not good enough or that you have failed your loved ones yourself and the society Well have you ever

thought that the problem could be in the method you are using to fight the problem and not necessarily your doing. Actually whatever method you might have been using might simply be defective which simply means that you shouldn't expect any different results. Proponents of NLP believe that how you behave has a certain structure to it. Therefore NLP aims to examine this structure to redefine the way your brain performs and responds to the information it receives. NLP helps you understand the things that make you tick. It opens your eyes to how you perceive the things that happen to you and around you on a daily basis. Your neurological system is responsible for transmitting all the information your brain receives from your environment. In this context your environment refers to everything external including all your organs, your ears, your eyes, your skin, stomach, lungs, and every other part of your body. Your brain processes the information from all these parts of your body and transmits them to your brain and vice versa. For instance, once your brain receives information it processes it and decides if it is good or bad news and then transmits it to emotions that could be joy, tears, or laughter. The takeaway here is that your brain determines how you respond to everything going on around you and how you communicate with others. Now imagine being able to somehow alter the way your brain handles this information and force it to react in a certain way. That is the whole logic behind NLP. This book gives a comprehensive guide on the following: Overview Of The History And Origins Of NLP, Mastery and body language, Persuasion, How To Influence People With NLP Techniques, Manipulation, Mind Control, Maximize Your Potential, Fundamental Concepts And Connection To Stoicism, Deception, Neuro linguistic Programming in Everyday Life AND MORE.
