No One Way Patricia Cranton, 1998      Authenticity in and through Teaching in Higher Education Carolin Kreber, 2013-02-11 What does it mean to be authentic Why should it matter whether or not we become more authentic How might authenticity inform and enhance the social practice of the scholarship of university teaching and by implication the learning and development of students Authenticity in and through Teaching introduces three distinct perspectives on authenticity the existential the critical and the communitarian and shows what moving towards greater authenticity involves for teachers and students when viewed from each of these angles In developing the notion of the scholarship of teaching as an authentic practice this book draws on several complementary ideas from social philosophy to explore the nature of this practice and the conditions under which it might qualify as authentic Other concepts guiding the analysis include virtue being communicative action power critical reflection and transformation Authenticity in and through Teaching also introduces a vision of the scholarship of teaching whose ultimate aim it is to serve the important interests of students These important interests it is argued are the students own striving and development towards greater authenticity Both teachers and students are thus implicated in a process of transformative learning including objective and subjective reframing redefinition and reconstruction through critical reflection and critical self reflection on assumptions It is argued that in important ways this transformative process is intimately bound up with becoming more authentic Rather than being concerned principally with rendering research evidence of what works the scholarship of teaching emerges as a social practice that is equally concerned with the questions surrounding the value desirability and emancipatory potential of what we do in teaching The scholarship of teaching therefore also engages with the bigger questions of social justice and equality in and through higher education The book combines Carolin Kreber s previous research on authenticity with earlier work on the scholarship of teaching offering a provocative fresh and timely perspective on the scholarship of university teaching and professional learning      *Building the Field of Higher Education Engagement* Lorilee R. Sandmann, Diann O. Jones, 2023-07-03 Community engagement has evolved as a respected field and now occupies a seat at the academic table In the past this work had often been relegated to the institutional fringes of higher education its practitioners marginalized and the work often portrayed as service not scholarly Today higher education community engagement is a dynamic and continually evolving field of scholarship and practice that carries ever increasing academic respect This book contributes to the ever under construction edifice by presenting a scaffolding of the scholarship that has been part of the building process documenting and analyzing the past speculating about the future and framing a continuing conversation about and for the field The three parts of this book are designed to promote a continuing field building conversation a look back at foundational documents of the field a set of provocative questions interrogating those foundational works and a look to the future by the next generation of leaders in the field The central part is the special 20th anniversary issue of the Journal of Higher

Education Outreach and Engagement which brings together key documents of the scholarship of engagement with reflections on those documents by key scholars and or the authors of the original works In addition to highlighting the foundations and evolution of the field this work also looks ahead to the next generation of voices and views as input to the conversation with a closing chapter that includes invited essays by nine outstanding community engaged thinkers and writers of the next 20 years who share their ideas about probable futures *Teaching, Learning, and Caring in Higher Education* JT Torres,2025-11-13 This practical resource illustrates how to establish and nurture relationships with intention paving the way for meaningful student instructor and content engagement Torres expertly peels back the layers of disengagement prevalent in today s college classroom and demonstrates how in person and online courses can form ecologies that empower students and teachers rather than exhaust them Informed by a rich blend of pedagogical research case studies and social interdependence learning theory this book features plentiful activities suggestions and templates for cultivating and connecting care throughout learning environments A worthwhile read for any faculty member regardless of level or discipline this book is especially relevant for those who are new to teaching concerned with student engagement or interested in redesigning their courses **Resources in Education** ,1999 **McGill Journal of Education** ,1976 Abstracted in Sociology of education abstracts The Journal of Education ,1893 **Annual Report - Carnegie Foundation for the Advancement of Teaching** Carnegie Foundation for the Advancement of Teaching,1929 **Wisconsin High School Supervision Leaflets [no. 1-14]** Wisconsin.
