Multimodality In Language And Speech Systems

Aurel Vlaicu, Stelian Brad

Multimodality In Language And Speech Systems:

Multimodality in Language and Speech Systems Björn Granström, D. House, I. Karlsson, 2013-04-17 This book is based on contributions to the Seventh European Summer School on Language and Speech Communication that was held at KTH in Stockholm Sweden in July of 1999 under the auspices of the European Language and Speech Network ELSNET The topic of the summer school was Multimodality in Language and Speech Systems MiLaSS The issue of multimodality in interpersonal face to face communication has been an important research topic for a number of years With the increasing sophistication of computer based interactive systems using language and speech the topic of multimodal interaction has received renewed interest both in terms of human human interaction and human machine interaction Nine lecturers contributed to the summer school with courses on specialized topics ranging from the technology and science of creating talking faces to human human communication which is mediated by computer for the handicapped Eight of the nine lecturers are represented in this book The summer school attracted more than 60 participants from Europe Asia and North America representing not only graduate students but also senior researchers from both academia and industry

A Multimodal Language Faculty Neil Cohn, Joost Schilperoord, 2024-05-16 Natural human communication is multimodal We pair speech with gestures and combine writing with pictures from online messaging to comics to advertising This richness of human communication remains unaddressed in linguistic and cognitive theories which maintain traditional amodal assumptions about language What is needed is a new multimodal paradigm This book posits a bold reorganization of the structures of language and heralds a reconsideration of its guiding assumptions Human expressive behaviors like speaking signing and drawing may seem distinct but they decompose into similar cognitive building blocks which coalesce in emergent states from a singular multimodal communicative architecture This cognitive model accounts for unimodal and multimodal expression across all of our modalities providing a grand unified theory that incorporates insights from formal linguistics cognitive semantics metaphor theory Peircean semiotics sign language gesture visual language psycholinguistics and cognitive neuroscience Such a perspective reconfigures how we understand linguistic structure diversity universals innateness relativity and evolution A Multimodal Language Faculty directly confronts centuries old notions of language and offers a compelling reimagination of what language is and how it works
