Knowing the Structure of Nature S. Psillos, 2009-04-30 In this sequel to the highly acclaimed *Scientific Realism How Science Tracks Truth* Psillos discusses recent developments in scientific realism and explores realist theses and commitments He examines the structuralist turn in the philosophy of science and offers a framework within which inference to the best explanation can be defended *Nature, Science, Realism* Thomas L. Buckley, 1995 This study is an important contribution to the present day discourse concerning the relations between literature and science within a nineteenth century German context It investigates a previously unexplored epoch in the discipline namely German Poetic Realism ca 1850 1890 with particular focus on the first twenty years of this period This movement prior to Naturalism is particularly crucial since it is a transitional stage in which a change in thinking patterns and perceptions takes place a shift from a Naturphilosophie point of view to a more natural scientific perspective This book utilizes the works of two representative authors of this period Adalbert Stifter and Gottfried Keller as well as the aesthetic program of German Poetic Realism as a means to analyze the impact of this transformation on the literary realm

Critical Realism for Marxist Sociology of Education

Grant Banfield, 2015-09-16 This book offers a critical realist intervention into the field of Marxist Sociology of Education Critical realism as developed by British philosopher Roy Bhaskar is known for its capacity to serve as a conceptual underlabourer to applied fields like education Indeed its success in clarifying and resolving thorny issues of educational theory and practice is now well established Given critical realism's sympathetic Marxist origins its productive and critical engagement with Marxism has an even longer history To date there has been little sustained attention given to the application of critical realism to Marxist educational praxis The book addresses this gap in existing scholarship Its conceptual ground clearing of the field of Marxist Sociology of Education centres on two problematics well known in the social sciences naturalism and the structure agency relation Marxist theory from the days of Marx to the present is shown to also be haunted by these problematics This has resulted in considerable tension around the meaning and nature of for example reform revolution class determinism and class struggle With its emergence in the 1970s as a child of Western Marxism the field continues to be an expression of these tensions that seriously limit its transformative potential Addressing these issues and offering conceptual clarification in the interests of revolutionary educational practice Critical Realism for Marxist Sociology of Education provides a new perspective on education which will be of interest to students scholars and practitioners alike

Critical Scientific Realism Ilkka Niiniluoto, 1999-12-09 Ilkka Niiniluoto comes to the rescue of scientific realism showing that reports of its death have been greatly exaggerated Philosophical realism holds that the aim of a particular discourse is to make true statements about its subject matter Niiniluoto surveys the different varieties of realism in ontology semantics epistemology theory construction and methodology He then sets out his own original version and defends it against competing theories in the philosophy of science Niiniluoto's critical scientific realism is founded upon the notion of truth as correspondence between language and reality and characterizes scientific progress in terms of increasing truthlikeness This makes it possible not only to take seriously but also to make precise the troublesome idea that scientific theories typically are false but nevertheless close to the truth

Buckley, 1990 **Rescher Studies** Robert Almeder, 2013-05-02 In a career extending over almost six decades, Nicholas Rescher has conducted researches in almost every principal area of philosophy, historical and systematic alike. In this extraordinary volume, two dozen scholars join in offering penetrating discussions of various facets of Rescher's investigations. The result is an instructively critical panorama of the many faceted contributions of this important American philosopher. Born in Germany in 1928, Nicholas Rescher came to the U.S. at the age of nine. He is University Professor of Philosophy at the University of Pittsburgh, where he has also served as Chairman of the Philosophy Department and as director and currently chairman of the Center for Philosophy of Science. In a productive research career extending over six decades, he has established himself as a systematic philosopher of the old style. His work represents a many-sided approach to fundamental philosophical issues that weaves together threads of thought from continental idealism and American pragmatism. And apart from this larger program, Rescher has made various specific contributions to logic, the conception of autodescriptive systems of many-sided logic, the history of logic, the medieval Arabic theory of modal syllogistic, to the theory of knowledge, epistemology as a quantitative approach in theoretical epistemology, and to the philosophy of science, the theory of a logarithmic retardation of scientific progress. Rescher has also
