Museums, Exhibitions, and Memories of Violence in Colombia Jimena Perry, 2023-06-16 This book explores how recent Colombian historical memories are informed by cultural diversity and how some of the country's citizens remember the brutalities committed by the Army guerrillas and paramilitaries during the internal war 1980-2016. Its chapters delve into four case studies. The first highlights the selections of what not to remember and what not to represent at the National Museum of the country. The second focuses on the well-received memories at the same institution by examining a display made to commemorate the assassination of a demobilized guerrilla fighter. The third discusses how a rural marginal community decided to vividly remember the attacks they experienced by creating a display hall to aid in their collective and individual healing. Lastly, the fourth case study also about a rural peripheral community discusses their way of remembering which emphasizes peasant oral traditions through a traveling venue. By bringing violence memory and museum studies together, this text contributes to our understanding of how social groups severely impacted by atrocities recreate and remember their violent experiences. By drawing on displays, newspapers, interviews, catalogs, and oral histories, Jimena Perry shows how museums and exhibitions in Colombia become politically active subjects in the acts of reflection and mourning and how they foster new relationships between the state and society. This volume is of great use to students and scholars interested in Latin American and public history.

Museums and the Natural Environment Peter Davis, 1996 This volume looks at the structure and role of museums in the light of the impact of environmental issues. It looks at the traditional roles played by museums and environmental organizations and asks how successful any partnership of ideas of the two has been and the path it should take.

The End of the Museum Kevin Coffee, 2025-08-08 This provocative book challenges frequently voiced assertions regarding museums as necessary and valued modern institutions. It raises fundamental existential questions about contemporary museums as products of the modern colonial world order. Drawing on practical examples of collecting and exhibiting, theoretical research, and critique from diverse countries across the globe including Chile, India, Korea, the Netherlands, Nigeria, Palestine, Portugal, Sri Lanka, and the United States, this book moves beyond the conventional

Eurocentric museological framework This book synthesizes contemporary critiques of museums while arguing that societies need the sociocultural examinations that museums are capable of facilitating and that radical transformations of the museum are fraught with difficulty but also possible and necessary Ultimately Coffee argues that museums can only be future orientated if they are transformed into agents of social justice and inclusion divestors of illicit collections and proponents of a liberatory ethic opposing neo colonialism in all of its forms During that transformative process as this book demonstrates museum practice and museum theory must also be transformed The End of the Museum Culture Colonialism and Liberation will appeal to students researchers and practitioners interested in a critical examination of museum work and theory
