Nature Works:

How Nature Works Sarah Besky, Alex Blanchette, 2019-10-15 We now live on a planet that is troubled even overworked in ways that compel us to reckon with inherited common sense about the relationship between human labor and nonhuman nature In Paraguay fast growing soy plants are displacing both prior crops and people In Malaysia dispossessed farmers are training captive orangutans to earn their own meals In India a prized dairy cow suddenly refuses to give more milk Built from these sorts of scenes and sites where the ultimate subjects and agents of work are ambiguous *How Nature Works* develops an anthropology of labor that is sharply attuned to the irreversible effects of climate change extinction and deforestation The authors of this volume push ethnographic inquiry beyond the anthropocentric documentation of human work on nature in order to develop a language for thinking about how all labor is a collective ecological act Works Thomas Carlyle, 1885
