"You can't add days to your life,  
but you can add life to your days."

and it changed my whole

**How to Build a Better World for Our Generation** Habtemariam Micael,2018-09-21 Teach about what matters Our job is to excite students and adult learners about the world to help them see the role that they can play in making society more equal and more just to express their ideas powerfully to see that social and historical materialism studies is about real people s lives and about their relationship to each other and to nature to be enlightened No matter how long the night the day is sure to come Transformation is only valid if it is carried out with the people not for them Liberation is like a childbirth and a painful one The person who emerges is a new person no longer oppressor or oppressed but a person in the process of achieving freedom is only the oppressed who by freeing themselves can free their oppressors The age of nations is past The task before us now If we would not perish it is to shake off our ancient prejudices and to build the earth You can be the most beautiful person in the world and everybody sees light and rainbows when they look at you But if you yourself don t know it all of that doesn t even matter To achieve a new and better order of society the oppressed working class need not allow their oppressors to represent them in parliament To decide which member of the ruling class is to repress and crush the people through parliament is the real essence of to realize the dictatorship character in the parliament Dictatorship is a rule based directly upon force and unrestricted by any laws The role of the oppressed societies need to be organized for the necessity of revolution to defeat dictatorship s ideology as it can never be solved by reformation according the revolutionary theory What we achieve inwardly will change outer reality Most people are not achieving their dreams because they are living in their fears Achievement is the product of conscious decisions and action that can challenge the tragedy of life Action clarity dare create the achievement of the required goal

necessary infinity of the first principle Creation is not thereby denied but seen as truly a constituent of the divine life The picture is thus monistic which is to say scientific as presenting a holistic system or way of seeing things absolutely or beyond appearance merely The consequences for human metaphysical and moral nature are rigorously drawn freed from all anthropomorphisms so as better to illuminate the insights of religion and philosophy The relevance for contemporary movements from palaeontology to Church ecumenism is brought out while a concluding epilogue attempts to shed light on the vexed debate on Europe in relation to the Christian inheritance Other concluding chapters treat of both sacramental religion and of dialectic as the method of reason whether in theology or in the world For the world without the reason is not an object of thought any more than you can wash the fur without wetting it in G Frege s words
