Rise And Fall Of One Nation:

Mobilising the Masses Matthew Cunningham,2022-04-05 The radical right has gained considerable ground in the twenty first century From Brexit to Bolsonaro and Tea Partiers to Trump many of these diverse manifestations of right wing populism share a desire to co opt or supplant the mainstream parties that have traditionally held sway over the centre right It is now more important than ever to understand similar moments in Australian and New Zealand history This book concerns one such moment the Great Depression and the explosion of large populist conservative groups that accompanied the crisis These citizens movements as they described themselves sprang into being virtually overnight and amassed a combined membership in the hundreds of thousands They staunchly opposed party politicians and political parties for their supposed inaction and infighting Whether left or right it did not matter They wanted to use their vast numbers to pressure their governments into enacting proposals they believed were in the national interest a smaller more streamlined government where Members of Parliament were free to act according to their conscience rather than their party allegiance At the same time the movements prescribed antidotes for their nations economic ill health that were often radical and occasionally anti democratic At the height of their power they threatened to disrupt or outright replace the centre right political parties of the time particularly in Australia At a time when fascism and right wing authoritarianism were on the march internationally the future shape of conservative politics was at stake *Italy and Australia* Gabriele Abbondanza,Simone Battiston,2023-12-30 This book offers a novel and comprehensive reappraisal of current relations between Italy and Australia For the first time it expands the scope of analysis by encompassing and critically reviewing research avenues that have been understudied so far In order to pursue this objective it provides innovative analyses on bilateral history reciprocal migration socio cultural ties international relations and trade comparative politics and scientific cooperation By adopting a multidisciplinary approach this book makes a significant contribution to multiple disciplinary literatures benefitting social science scholars policymakers and professionals working in a number of fields Mindful of the wide scope and multidisciplinary nature of this innovative research the editors oversee a careful balance of different theories methodologies sources and data in accordance with the conventions of each discipline employed in this volume As a result this book encourages a broader and more nuanced understanding of Italian Australian relations in the 21st century **Designing One Nation** Katrin Schreiter,2020-07-13 Designing One Nation is the first comprehensive study to examine the intertwined economic cultures of divided Germany from the 1940s until the 1990s Education and Life James Alfred Dale,1924 **A homiletic commentary on the Book of the prophet Ezekiel. Chapters i-xi by D.G. Watt, chapters xii-xxix by T.H. Leale, chapters xxx-xlviii by G. Barlow** David Gilkison Watt,1890 *A neoliberal revolution?* Aled Davies,James Freeman,Hugh Pemberton,2024-07-09 This book examines the Thatcher government s attempt to revolutionise Britain s pensions system in the 1980s and create a nation of risk taking savers with an individual stake in capitalism Drawing upon recently released archival records it shows how the

ideas motivating these reforms journeyed from the writings of neoliberal intellectuals into government and became the centrepiece of a plan to abolish significant parts of the UK's welfare state and replace these with privatised personal pensions. Revealing a government that veered between political caution and radicalism, the book explains why this revolution failed and charts the malign legacy left by the evolutionary changes that ministers salvaged from the wreckage of their reforms. The book contributes to understanding of policy change, Thatcherism and international neoliberalism by showing how major reforms to social security could reflect neoliberal thought and yet profoundly disappoint their architects.

The Chickenhawk Syndrome Cheyney Ryan, 2009 In recent years the question of war and sacrifice has been a major topic of political debate and controversy. If our country goes to war for reasons we endorse, what is our responsibility to share in its sacrifices? Does supporting a war mean serving in it? Does it mean encouraging our children to do so? Such questions have been posed by the so-called chickenhawk phenomenon: pro-war leaders and their pro-war children who call on Americans to assume the burden of war and its sacrifices but avoid those sacrifices themselves. President Bush and other architects of the Iraq conflict were the most prominent chickenhawks. Cheyney C. Ryan argues that the chickenhawk issue is not just a matter of personalities; it will remain with us for a long time even though the Bush administration has left office. Ryan poses fundamental questions of war and personal sacrifice, pointing to the basic disconnection in American politics generally between the support for war and the willingness to assume its costs, which he calls Alienated War. Calling for the reinvigoration of civic involvement, this illuminating and insightful book offers both a philosophical and historical exploration of America's citizen-soldier tradition and the consequences involved in separating the citizenry from the armed forces.
