Insurance, Risk Management, and Public Policy Sandra G. Gustavson,Scott E. Harrington,1993-10-31 Five years ago the world lost one of its most prolific insurance scholars Dr Robert I Mehr His death in 1988 signalled the passing of not only a gifted writer and researcher but also a pioneering teacher mentor and friend The essays compiled within this volume are intended as an appropriate tribute to this occasionally outrageous individual who touched the lives of so many within the insurance community Bob Mehr was a teacher who expected and demanded nothing less than perfect scholarship and flawless efficient writing Among alumni of the University of Illinois insurance doctoral program stories still abound of late night and early morning sessions in which students and professor painstakingly debated precise words and phrases for dissertations journal articles and textbooks Bob s respect for language was both immense and contagious if at times more than a little compulsive He joked that he could not read letters or novels without pencil in hand for editing Bob s respect for his doctoral students was equally evident The confidence he displayed in his students abilities was sometimes startling but competence assumed often begot competence in fact The accomplishments and records amassed by the many who studied with Bob Mehr are impressive and ongoing On the dedication page in his final textbook *Fundamentals of Insurance* Bob spoke of his affection for those he called his academic progeny and wished them happiness as they build their own academic families Merchant Marine War Risk Insurance United States. United States. Congress. House. Committee on Merchant Marine and Fisheries,1939 Embracing Risk Tom Baker,Jonathan Simon,2010-02-15 For much of the twentieth century industrialized nations addressed social problems such as workers compensation benefits and social welfare programs in terms of spreading risk But in recent years a new approach has emerged using risk both as a way to conceive of and address social problems and as an incentive to reduce individual claims on collective resources Embracing Risk explores this new approach from a variety of perspectives The first part of the book focuses on the interplay between risk and insurance in various historical and social contexts The second part examines how risk is used to govern fields outside the realm of insurance from extreme sports to policing mental health institutions and international law Offering an original approach to risk insurance and responsibility the provocative and wide ranging essays in Embracing Risk demonstrate that risk has moved well beyond its origins in the insurance trade to become a central organizing principle of social and cultural life Merchant Marine Legislation (55% Subsidy, War Risk Insurance, Trade-in of Obsolete Vessels) United States.
