Risk Based Environmental Decisions:

Risk-Based Environmental Decisions Douglas J. Crawford-Brown, 2013-10-03 Risk Based Environmental Decision Methods and Culture presents the principles of human health risk analysis as they are applied in environmental decisions It balances the discussion of scientific theory and methods philosophical analysis and applications in regulatory decisions The material is directed towards risk analysts who must apply their skills in a policy setting and towards policy analysts who must use risk estimates The presentation is suited ideally as an introductory text on the methods of risk analysis and on the cultural issues that underlie these methodologies An important feature of Risk Based Environmental Decision Methods and Culture is that it is designed around a series of detailed case studies of environmental risk analysis which walk the reader from the historical nature of the problem to the formulation as a risk based problem to the conduct of risk analysis and on to the application debate and defense of the risk analysis

Science and Decisions: Committee on Improving Risk Analysis Approaches Used by the U.S. EPA, Board on Environmental Studies and Toxicology, Division on Earth and Life Studies, National Research Council, 2009-02-24 Risk assessment has become a dominant public policy tool for making choices based on limited resources to protect public health and the environment It has been instrumental to the mission of the U S Environmental Protection Agency EPA as well as other federal agencies in evaluating public health concerns informing regulatory and technological decisions prioritizing research needs and funding and in developing approaches for cost benefit analysis However risk assessment is at a crossroads Despite advances in the field risk assessment faces a number of significant challenges including lengthy delays in making complex decisions lack of data leading to significant uncertainty in risk assessments and many chemicals in the marketplace that have not been evaluated and emerging agents requiring assessment Science and Decisions makes practical scientific and technical recommendations to address these challenges This book is a complement to the widely used 1983 National Academies book Risk Assessment in the Federal Government also known as the Red Book The earlier book established a framework for the concepts and conduct of risk assessment that has been adopted by numerous expert committees regulatory agencies and public health institutions The new book embeds these concepts within a broader framework for risk based decision making Together these are essential references for those working in the regulatory and public health fields

Making Better Environmental Decisions Mary O'Brien, Environmental Research Foundation (Annapolis, Md.), 2000 For the past quarter century government and the private sector have relied heavily on risk assessment for making decisions allowing widespread environmental deterioration In this book Mary O'Brien recommends a simple yet profound shift to another decision making technique alternatives assessment Instead of asking how much of a hazardous activity is safe which translates into how much damage the environment can tolerate alternatives assessment asks how we can avoid or minimize damage while achieving society's goals Alternatives assessment is a simple commonsense alternative to risk assessment It is based on the premise that it is not acceptable to damage human and nonhuman health or

the environment if there are reasonable alternatives The approach calls for taking precautionary measures even if some cause and effect relationships have not been fully established scientifically The process must involve an examination of the full range of alternatives including no action at all Equally important it must be democratic and include potentially affected parties O'Brien not only makes a persuasive case for alternative assessment she tells how to implement it She also shows how this technique has profound implications for public health for our stewardship of the environment and for a truly democratic government Published in association with the Environmental Research Foundation

Handbook for Environmental Risk Decision Making C. Richard Cothorn, 2019-09-17 This handbook describes the broad aspects of risk management involving scientific policy judgment uncertainty analysis perception considerations statistical insights and strategic thinking This book presents all the important concepts to enable the reader to see the big picture This ability is extremely important it allows the decision maker to see the big picture

Environmental Decision-Making in Context Chad J. McGuire, 2017-09-25 Because of the complexity involved in understanding the environment the choices made about environmental issues are often incomplete In a perfect world those who make environmental decisions would be armed with a foundation about the broad range of issues at stake when making such decisions Offering a simple but comprehensive understanding of the critical roles science economics and values play in making informed environmental decisions *Environmental Decision Making in Context A Toolbox* provides that foundation The author highlights a primary set of intellectual tools from different disciplines and places them into an environmental context through the use of case study examples The case studies are designed to stimulate the analytical reasoning required to employ environmental decision making and ultimately help in establishing a framework for pursuing and solving environmental questions issues and problems They create a framework individuals from various backgrounds can use to both identify and analyze environmental issues in the context of everyday environmental problems The book strikes a balance between being a tightly bound academic text and a loosely defined set of principles It takes you beyond the traditional pillars of academic discipline to supply an understanding of the fundamental aspects of what is actually involved in making environmental decisions and building a set of skills for making those decisions
