

Ritual and Mantras: Rules Without Meaning

Ritual and Mantras: Rules Without Meaning is an original study of ritual and mantras which shows that rites lead a life of their own, unaffected by religion or society. In its analysis of Vedic ritual, it uses methods inspired by logic, linguistics, anthropology and Asian studies. New insights are offered into various topics including music, bird song and the origin of language. The discussion culminates in a proposal for a new human science that challenges the current dogma of "the two cultures" of sciences and humanities.

Frits Staal, Professor Emeritus of Philosophy and of South Asian Languages at the University of California, Berkeley, studied and taught in Europe, Asia and the United States. His interests range from logic to the human sciences. His books in English include *Advaita and Neoplatonism*, *Nambudiri Veda Recitation*, *Exploring Mysticism*, *The Science of Ritual Agni: The Vedic Ritual of the Fire Altar*, *Universals: Studies in Indian Logic and Linguistics* and *The Cloud of Knowing: Concepts of Science in Europe and Asia*.

Theorizing Rituals Jens Kreinath, Michael Strausberg, 2006 Volume two of *Theorizing Rituals* mainly consists of an annotated bibliography of more than 400 items covering those books edited volumes and essays that are considered most relevant for the field of ritual theory Instead of proposing yet another theory of ritual the bibliography is a comprehensive monument documenting four decades of theorizing rituals **Rituals, Mantras, and Science** Jayant Burde, 2004-01-01 In this book the author discusses the places of science in rituals and mantras Using structural analysis he shows that rituals in general whether religious political social or otherwise have common structural patterns These patterns are shared by poetry music dance and gymnastics but not by language Consideration of animal rituals and pathological rituals leads him to propose a general theory which unifies all rituals like activities **The Craft of Ritual Studies** Ronald L. Grimes, 2014 Readership Students and scholars of ritual studies religious studies anthropology *Embodying the Vedas* Borayin Larios, 2017-04-10 Popularly Hinduism is believed to be the world's oldest living religion This claim is based on a continuous reverence to the oldest strata of religious authority within the Hindu traditions the Vedic corpus which began to be composed more than three thousand years ago around 1750-1200 BCE The Vedas have been considered by many as the philosophical cornerstone of the Brahmanical traditions stika even previous to the colonial construction of the concept of Hinduism However what can be pieced together from the Vedic texts is very different from contemporary Hindu religious practices beliefs social norms and political realities This book presents the results of a study of the traditional education and training of Brahmins through the traditional system of education called gurukula as observed in 25 contemporary Vedic schools across the state of Maharashtra This system of education aims to teach Brahmin males how to properly recite memorize and ultimately embody the Veda This book combines insights from ethnographic and textual analysis to unravel how the recitation of the Vedic texts and the Vedic traditions as well as the identity of the traditional Brahmin in general are transmitted from one generation to the next in contemporary India *Women Who Fly* Serinity Young, 2018-01-02 Flying

women are a common motif in the world's myths and religions. Not necessarily winged, these women elicit reactions of fear, fascination, and ambivalence, and in so doing reveal much about the perceptions of female power and sexuality through the ages. The first book to systematically chronicle the figure of the flying woman in myth literature and art, *Women Who Fly* sheds new light on the ways in which women have both influenced and been understood by society and religious traditions around the world. Prabuddha Bharata, 2007. Theorizing Rituals: Issues, topics, approaches, concepts Joannes Augustinus Maria Snoek, 2006. Volume one of *Theorizing Rituals* assembles 34 leading scholars from various countries and disciplines working within this field. The authors review main methodological and meta-theoretical problems, part I followed by some of the classical issues, part II. Further chapters discuss main approaches to theorizing rituals, part III, and explore some key analytical concepts for theorizing rituals, part IV. The volume is provided with extensive indices. **The Nature and Function of Rituals** Ruth-Inge Heinze, 2000-01-30. From time to time immemorial people have performed rituals out of a deep-rooted human need to come into the presence of the Divine. When a theophany is reenacted, harmony and balance necessary for leading a satisfactory life are restored to the individual participants and to the community as a whole. This collection of seventeen studies illuminates the power of ritual to facilitate life transitions and includes discussion of rituals associated with childbirth, adolescent initiation, wedding, and funeral rites, and rituals used to resolve conflict and reinforce the solidarity of a community. The reader will observe how rituals resolve the tension between modernity and tradition and will understand why rituals have not lost their power over the millennia. **The Meaning of Lives** Richard A. Hutch, 1997. This study examines how the process of reading and writing other people's lives implicates readers and authors in what is ultimately an endeavour of autobiographical introspection and reflection. The book starts from the assumption that the use of writing and reading about individual lives in recent scholarship in religion, the human sciences, and literary biography has greatly revived interest in the personal, concrete, and meaningful side of the study of world religions. **A Translation of the Ancient Chinese : the Book of Burial (Zang Shu) by Guo Pu (276-324)** Juwen Zhang, 2004. The *Book of Burial* defined fengshui for the first time; it integrated various local beliefs and practices into the dominant Confucian tradition. It is therefore key to any understanding of Chinese culture. Based on the edition of the *Book of Burial* (Zang Shu), most popular during the last millennium, this translation makes available the text that links the widespread Chinese practice of fengshui geomancy to the fundamental beliefs and moral principles of Chinese culture. This annotation and commentary serve to place the text and the history of burial ritual in the proper cultural context. The translator's introduction, which explores the questions of the interaction between elite and folk culture and the continuity of tradition, suggests an interdisciplinary approach to the study of fengshui. **With a Single Glance** Cynthia J. Bogel, 2009. Ranges broadly across imagery, place, and time, allowing Buddhist icons and spaces to look back and return the viewer's glance. Acta Orientalia Vilnensia, 2000. *Annual Review of Anthropology*, 1997. Supplemento ... agli Annali, 1995. **Philosophy East & West**, 1990.

Multilingualism, Lingua Franca and Lingua Sacra Jens E. Braarvig, Markham J. Geller, 2018 The present book comprises a number of studies centered around the topic of how knowledge diffuses from one culture to another and how knowledge diffusion is connected with the spread of languages and the conceptual systems they carry by translation This diffusion also takes place also over linguistic borders in the way that a given receiving language may also absorb systems of knowledge from languages that are linguistically quite unrelated but culturally connected with respect to knowledge transfer Thus we find that Sumerian concepts with considerable impact were moved into the Akkadian language along with writing systems religion science and literature even though linguistically the languages are completely unrelated Another example is how Chinese culture and writing systems spread throughout East Asia into Korea Japan and Vietnam though the languages of these countries were linguistically unrelated to Chinese The same case can be made for Buddhist ways of thinking when it was clothed in the garb of Chinese or Tibetan or one of the other languages along the Silk Road This is also true for the spread of Manicheism as it was portrayed in a great number of languages related or unrelated German and Latin are linguistically related but when Latin learning was communicated in Old High German many of its terms were created in Middle German to accommodate the Latin conceptual world and the German language was lastingly enriched with novisms denoting concepts of the Classical traditions of learning in a process parallel to the spread of Greek Christianity into the East European cultures and languages The book describes some cases of such knowledge transfer and what kind of mechanisms are involved in the ensuing language changes in the receiving languages and cultures
